Total Experience: 4 Year(s) 11 Month(s)

Highest Degree: BTECH [Information science]

Notice Period: 3 Months

Malcolm Richard C Featured

AssocApp Developer ,Software Development, Project Mang,Requirement Analysis,Solution Arch,Azure data factory, Databricks, Azure runbook, Logicapps, Az Data warehouse ,SSQL,MySQL,PowerShell,MS SQL Server,MySQL,SSIS,SSAS, CI/CD implmt,snowflake

Current Designation: Associate Application Developer -IT

Current Company: Unisys

Current Location: Bengaluru / Bangalore
Pref. Location: Bengaluru / Bangalore

Functional Area: IT Software - Application Programming /

Maintenance

Role: Software Developer

Industry: IT-Software/Software Services

Marital Status: Single/unmarried

Key Skills: Associate Application Developer, Project Management, Requirement Analysis, Solution

Architecture, SQL, MySQL, PowerShell, MS SQL Server, PostgreSQL, SSIS, SSAS, Azure datafactory, Azure databricks, Azure

runbook, Azure Logicapps

Verified: Phone Number | Email - id

Last Active: 20-Jan-21 Last Modified: 20-Jan-21

Summary

Confine 4 years of experience in Business Analytics. Ebulliently worked with wide range of technical aspects and respective teams inculcating all essentials needed to brew my knowledge and covering most of the areas of Software Development Life Cycle such as Requirement Analysis, Development, Integration and Production Roll outs.

Work Experience

Unisys as Associate Application Developer -IT Jan 2019 to Till Date

AssocApp Developer seeking roles in Software Development, Project Management, Requirement Analysis, Solution Arch, Azure data factory, Databricks, Azure runbook, Logicapps, Az Data warehouse ,SSQL, MySQL, PowerShell, MS SQL Server, MySQL, SSIS, SSAS

Cognizant Technologies Solutions as Senior Systems Executive

Jan 2016 to Jan 2019

Projects Worked: Payless, HPE, Orkla foods, Voya, Heineken, Regeneron, Cognizant Internal.

Project activities:

Operational Data Store (ODS) is an environment that pulls together, validates, cleanses and integrates data from disparate source application systems.

Extracted data from sources and transformed the data using different transformations like data conversion, derived columns, look up, Conditional Split, Union all transformations.

Daily activities involve DDL and DML. (Stored Procedures, Functions, Cursors, triggers #tables, CTE)

Good experience in writing complicated SQL Queries and database analysis for good performance.

Creation of ETL packages for loading data from different data sources into Data warehouse or ODS (operation Data Store).

Migration of complete architecture from Linux/MYSQL to Azure Devops (SQL Managed Instances)

Using Azure data factory.

Creating Stored procedures to generate data to fact tables in Azure Datawarehouse.

Managing incremental load both in SQL and Azure.

1/22/2021

Creation of pipelines using Azure Data Factory (copy, metadata, lookup ,forloop, move, delete,if,filters etc)

Using of Azure Integration runtime and Storage provided by Azure(ADLS)

Building configurable pipeline solutions using Azure Data factory.

Using Blob storage, Azure Analytics, SFTP datapoints for getting data.

Using of Logics Apps for Email alert Configuration and SharePoint Upload.

Conditional pipelines and parametrized pipelines for multiple clients - Azure Data Factory

Integration run time setup for SFTP connectivity and connecting various sources.

Working on data bricks for ingestion and processing of data in spark cluster.

Single notebook designed for commercial clients making a configurable solution with a mixture of data factory.

Creation of Keyrefresh Module for automatic SaaS refresh Via automation accounts and secured and Emailed to the recipient.

Tabular Design and processing for HPE client with SSAS and SSIS integration via oracle data source And service now data.

Have Experience in debugging and improving lot of performance issues in the SQL Queries to enhance the performance of loading the data as well as the Dashboards.

Understanding the business needs and provide the solutions accordingly.

Fetching data from various sources, creating Metrics, analyzing logics and measures, Configuring Dashboards and visualized using Power BI, eMite

Architecture Design for various Analytical Tools solutions in order to connect with different sources (MSSQL, AWS Redshift, Flat files, ODBC, RESTAPI (NICE inContact)

Integrated with various IT Operation tools like ITSM, Device Monitoring, Call Management System, Application Monitoring etc.

Gathered functional and non-functional client requirements in order to optimize the design of BI deliverables (reports, dashboards, alerts, visualizations)

Convert Requirements to Insights in the form of Dashboards using BI tools

Interacting with clients across NA, EMEA and APAC regions for RGT & delivery

Presenting Demo for the Customers on the Application and reporting functionalities.

Keeping Database backup and mirroring and Recovery module.

Backup and restoration of database and tables.

Experienced in preparing and executing Unit Test Plan and Unit Test Cases after software development.

Co-ordinate with offshore team and cross-functional teams to ensure that applications are properly tested configured and deployed.

Assigning tasks to Team members and get it done on time with proper KT provided on the jobs assigned to them.

Handling SQL, Application, networking level issues and escalation

Education

UG: B.Tech/B.E. (Computers) from Visveswaraiah Technological University (VTU) in 2015

PG: BTECH (Information science) from Visveswaraiah Technological University (VTU) in 2015

Other Qualifications/Certifications/Programs:

Azure developer certified

IT Skills

Version Last Used Experience

DynaTrace, AppDynamics
