# Ravikant Khond (1) Featured

A result-oriented professional with nearly 14 years of experience in Micro services/API based and Enterprise application development targeting senior level assignments

Current Designation: Lead - Application Development Total Experience: 13 Year(s) 0 Month(s)

Current Company: BNY Mellon Technologies Notice Period: 2 Months

Current Location: Pune Highest Degree: MS/M.Sc(Science) [Computers]

Pref. Location: Pune

Functional Area: IT Software - Application Programming /

Maintenance

Role: Software Developer

Industry: IT-Software/Software Services

Marital Status: Married

Key Skills: Python, Flask, Servicenow, Perl Automation, Agile Development, Jenkins, Rundeck, MongoDB, Javascript,

**CICD Process Implementation** 

Verified: Phone Number | Email - id

Last Active: 19-Jan-21 Last Modified: 19-Jan-21

### Summary

Worked on large-scale business application architecture and design efforts; developed and maintained application architectures for various business functional areas; resolved integration and interface issues between various applications or systems with focus on optimizing application performance and scalability

Steered efforts in leading the design, development and integration of micro services developed using Python, NodeJS, React, Redux and Spring Boot.

Thought leader and change agent with over a decade of experience in designing and implementing enterprise and, microservices based applications.

Designed and implemented solutions that remedy core business issues and position the organization to reach the next level of profitability through technology

Gained exposure in application development, requirement specification, system configuration specification, business and technical traceability documentation

# Work Experience

BNY Mellon Technologies as Lead - Application Development Apr 2012 to Till Date

Growth Path:

Apr'12-May'16 as Distributed Application Developer Since May'16 as Lead - Application Development

Projects Undertaken:

Big Brother Data Discovery Services - This project was used for populating data for CMDB called as BigBrother

Client Portal - This project had a Client facing portal where client can log tickets, requests items, gain access to knowledge database

MyEA - This project had Internal portal used by different teams to perform different day to activities

Key Results Areas:

As a senior member of the team and a practitioner of devops, I had ownership over several modules of the application including designing and implementing

technical solutions and handling deployments to prod and non-prod regions.

Leading the design, development and integration of micro services developed

using Python, NodeJS, React, Redux and Spring Boot

Fostering ServiceNow development which includes REST API development, creating catalog items and developing underlying ServiceNow workflows associated with catalog items.

Quickly upgraded myself with many new technology skills and successfully demonstrated its use in benefit to the project

Steering the successful roll-out of projects involving defining scope, setting timelines, analyzing requirements, prioritizing tasks, identifying dependencies and evaluating risks & issues

Facilitating implementation of the product involving documentation and execution of varying sizes of customizations, implementation of standard processes and maintenance & up-grading existing product

As an individual contributor looked after the project progress & outstanding issues and ensured the quality & timeliness of the deliverables

Undertaking development & testing, defect & issue management for software applications; conducting reviews of codes & test cases and analyzing change requests / enhancements

Managing end-to-end development of software products / projects from inception, requirement specs, planning, designing, implementation, configuration, documentation and closure with cross-cultural teams Analyzing issues and managing changes in rapid development process Providing post-implementation, application maintenance and enhancement support to the client regarding the product/ software application

### Cappemini Consulting India Pvt. Ltd as Consultant

Jun 2010 to Mar 2012

Project Undertaken:

Client: Volvo Car Corporation Title: ICA Migration Program

This project falls under Delta Program, under which the project had the task of moving the ACR, MCRP and SCRP applications from the Ford's server to Volvo's similar Clone environment.

This project tracked different internal control processes. For example, ACR keeps track of applications control review. Application control review helps to maintain confidentiality, integrity and availability of different IT applications used in organization Highlights:

Implemented technical solutions using Perl and CGI as Programmer in a midsize team Evaluated the functional aspects and user requirements of the client by interacting with them

Analyzed the tools and infrastructure required to set up a clone of FORD environment and migrated the same into VOLVO environment without any compromise on the business, operational or system processes and objectives Steered efforts towards System Setup and prepared it for applications which involved multiple software installation on the servers and lot of configurations including Web Server and Single Sign On

Created AOD (Application Overview Document) and also various application take-over documents

Monitored past tickets and coming up with a solution for the same and on time delivery

Conducted code review, Unit Testing and Integration testing

Recognized with

Bravo Extra Miler Award

Project Star Award

## KnowledgeWorks Global Ltd. as Senior Software Engineer

Jan 2007 to Jun 2010

Growth Path:

Jan'07-Apr'10 as Trainee Software Engineer

Apr'10-Jun'10 as Sr. Software Engineer

Projects Undertaken:

XML Editor - A Java swing based XML editor

KGL2XYV Conversion Tool - A Perl based tool that could help converting file from one format to other

Ads OnLine - Was a client facing Perl/CGI based website which was used by client to raise request to create ads and track the progress

Highlights:

Developed & supported Perl based data extraction and formatting scripts Significant Accomplishments:

Proposed the project XML editor which was successful with the help of other 3 colleagues which helped in saving a huge cost of company and added great user friendliness to end users

#### **Education**

UG: B.Sc (Computers) from Pune University in 2005

PG: MS/M.Sc(Science) (Computers) from Pune University in 2007

Other Qualifications/Certifications/Programs:

IT Infrastructure Library Version 3.0 (ITIL V3)

Microsoft Certified Azure Fundamentals

#### IT Skills

Skill Name	Version Last Used Experience
Python, Perl	
Jenkins, Rundeck, PLSQL Developer	
Oracle 11g, Mongo DB(no sql)	
VS Code, TFS, GIT	
ServiceNow	

# **Languages Known**

Language	Proficiency	Read	Write	Speak
English				
Hindi				
Marathi				

#### **Affirmative Action**

Category: General

Job Type: Permanent

Physically Challenged: No

Employment Status: Full time

**Work Authorization**
