Responsible for implementing Jdbc, Servlet and JSP related Business logic coding.

Having good experience in Security Code Analyzer like HP Fortify Tool.

Having good experience in Spring (Core and MVC) Framework.

Having good Knowledge on SpringBoot and MicroServices.

Having good experience in ORM tool like Hibernate.

Having good experience in Oracle 11g(Sql/Plsql).

## Work Experience

Xeon System Pvt Ltd as Software Engineer - JAVA

Apr 2019 to Till Date

Projects info

Project #1 AP Workflow Management (AP Process)

Domain Financial Domain Client Transworld. Dubai

Duration April 2019 -Till the Date

Team Size

Technologies J2SE, Oracle, Jboss

Description:

AP Work Flow Management:

This tool is built to manage processing of AP invoices through a Workflow which includes - starting with scanning of hardcopy invoices & related supporting and till capture of payment details for a particular invoice.

Scanning:To scan the invoices and supporting into WFM tool (Omniflow), Omniscan is used and this one is a webbased application.

Indexing: Vendor helpdesk analyst after scanning indexes the fields in the form and submits the invoices and system

routes the invoices to Approver or Supply chain management based on invoice type. Vendor helpdesk analyst can also return the invoice to Vendor if required information or supporting is not available to process further.

User Dept (Approver): Approvers' access invoices routed to them for approval and either "Approve", "reject" or "Hold" as

SCM:SCM analyst creates GRN in Oracle for invoices / workitems routed to SCM gueue post required validation and update "GRN number" on the form and submit invoices in WFM tool to be routed to AP for accounting the invoices in Oracle

AP Executive: AP Executive generates AP Voucher post validation and updates "AP voucher number" in the field on form and submits the workitem item for QC to AP Supervisor queue

AP Supervisor: AP Supervisor validates the accounting entry (AP Voucher number) with details available in workitem and submits the workitem in WFM tool after approving the entry in Oracle. Workitem moves to Payment details updation to capture payment details on the said workitem.

Payment details updation: This workstep is a system updation workstep and no manual intervention is involved. Utility in WFM tool picks payment details from file saved by Comviva Oracle analyst based on AP Voucher number available on the form and accordingly updates on the form and moves the workitem to Expiry.

Expiry: This workstep is last one in Omniflow and workitem exits from this workstep after 30 days of entry into this. After 30 days, workitem moves to Omnidocs and exits from Omniflow / WFM.

Note: Query can be raised @ worksteps - User Dept, SCM, AP Executive and AP Supervisor through workitem if validations become incorrect at a particular workstep as per User.

Roles and Responsibilities:

Involvement to developing action classes and jsp's.

Involved in the development of java beans, and Dao's for data access using Object Relational Mapping with Java Database connectivity.

Responsible for developing the Core java code for Business

Responsible for Unit Testing and Test Case Execution.

Responsible for implementing database connections.

Requirement understanding and analysis.
