Extensively utilized Object Oriented Programming and Design Patterns. Experienced in Microsoft technologies - .NET Framework, ASP.NET, WPF, SQL Server. Designed Test Cases for Unit Testing, Integrations Testing and Coded UI testing.

## **Work Experience**

NCR Corporation as Software Engineer -Dot Net Dec 2017 to Oct 2020

Projects

1.Emerald

2 .Advanced Store

Emerald - Point of Sales

Project Overview: The cloud first enterprise POS platform that gives you everything you need to run your supermarket from POS to payments to back office, loyalty and beyond.

Retail Store Solution is a leading-edge point of sale software solution focused on the checkout marketplace - From large hypermarkets and supermarkets to small convenience stores, the primary focus of Retail Store is on the grocery, fuel POS and specialty sectors.

The solution includes a robust POS, built-in customer promotions, configurable reporting capabilities and support for both consumer and mobile POS, self-checkout, fuel and quick service POS. Designed to utilize the innovative NCR platform services.

#### Responsibilities:

Involved in gathering the requirements and defined the business rules to user requirements in SDLC and analysis of the system based on MVVM architecture. Used Agile methodology to emphasize face-to-face communication over written documents and make sure that iteration is passing through a full software

development cycle.

Worked on TFS for version control, Code Review and for automatic builds and continuous Integration.

Followed Agile methodologies (Scrum) and Development-Driven Test.

Responsible for innovative approach for enhancements over existing applications to meet with current business demands.

Responsible for developing solutions (C#, ASP.Net Web Services, WPF, VS 2013, VS Code and SQL Server 2012).

Have knowledge in JavaScript, jQuery, TypeScript, NPM, NodeJS, Entity Framework Responsible for creating Unit Test Cases, Integrations Tests and Coded UI tests. Worked with R10 Web client to execute RTIs.

Implemented ASP.Net Web Service Methods to access data from the database.

Advanced Store - Point of Sales

Project Overview: NCR Advanced Store (AS) is a retail software solution developed for large-scale general merchandise retailers who require a robust Point of Sale (POS) application. The AS software solution provides retailers with the flexibility and functionality to meet their changing business needs.

#### Responsibilities:

Involving in Requirement Analysis and preparing basic level Design Document for features

Following best coding practices

Given many featured demos.

Used Agile methodology to emphasize face-to-face communication over written documents and make sure that iteration is passing through a full software development cycle

Responsible for innovative approach for enhancements over existing applications to meet with current business demands.
