## **Work Experience**

**HCL Technologies Ltd.** as Senior Software Engineer

Nov 2018 to Till Date

**PROJECT** 

Project Name : UCast Services

Role/Position : Development (Development)-Developer - Senior - 1

Language : Elasticsearch, Python, Codeigniter (Framework) ,MY SQL , Cloudera.

Project Description : uCast Global is the first choice for the worldwide distribution and monetization of streaming video. Our state-of- the-art solution lets content and service providers access an unparalleled global video highway, seamlessly integrating industry-best tools and technologies from premium partners across the video value-chain. With minimum upfront capital cost and a lucrative revenue sharing option for our customers, we build, manage and monetize the streaming video experience from ingest to final playback, decreasing complexity and panding global reach.

Responsibilities : In this project user interaction data fetched from SSAI server while playing content on a channel. After fetching this data we comparison is done with CMS data of channel including EPG, channel info and movie info to create various events according to the content

user has played. After all these steps, these events pushed to CMS system for showing data on analytics dashboard.

Technical Environment: ElasticSearch, Python, MYSQL.

- : Insights Pro for Flipkart
- : Developer

: Call auditing tool for Flipkart. Evaluators evaluates the calls and emails based on vendors, there are various forms which are categories into meta data and attributes, First of all Supervisor upload the roster of call and emails data, then tool automatically assigns forms according to vendor, campaign, location and lob and evaluator evaluates the audit. Call uploading functionality is also provided. Team View feature is provided to Supervisor. More access level are there like Admin, Enterprise, professional. Reporting and Dashboard is also great feature of the tool which present the customize detail analysis of the audits.
