# **Genpact** as RPA Blue Prism Developer Jan 2018 to Jan 2019

Project: Account Payable Role: RPA Blue Prism Developer

Description: The as is process involves clerical tasks like operators resolving errors in Process Director which may have been stuck here due to multiple issues and posting/rejecting/routing the invoices. The process performance is measured by timeliness and accuracy of the invoices being posted, rejected or re-routed through a workflow. The process aims to resolve as many issues as possible without looking at the invoice image and posting through the SAP data.

#### Responsibilities:

- \* Have used SAP mode to spy Sap Application.
- \* Have used Excel VBO object to perform operation in excel sheet while taking excel sheet data as input
- \* Responsible for providing updates to the clients in our daily scrum call.
- \* Actively involved in all the phase of development.
- Have created ODI and PDI

Project: Records to Report fixed assets depreciation run

Role: RPA developer

Description: The Planned Posting Run is the standard periodic run to post planned depreciation. This should be used when the last depreciation run was successful, and it's time to carry out the depreciation run as part of the new period-closing process. The Unplanned Posting run allows posting outside of the normal processing cycle (for example monthly). This option is not same as unplanned depreciation. Several periods can be posted in a single run with this option. By setting this indicator, the system does not check for the connection to the previous period and allows skipping over periods.

#### Responsibilities:

- \* Have used Excel VBO object to perform operation in excel sheet while taking excel sheet data as input.
- Have used SAP mode to spy Sap Application.
- \* Have used process, objects, work queues, calculation stages to write my logic in Blue Prism.
- \* Responsible for providing updates to the clients in our daily scrum call.
- Actively involved in all the phase of development.
- Analysing, understanding, and documenting the business processes in detail where required.
- \* Configuring new Blue Prism processes and objects using core workflow principles that are efficient, well structured, maintainable and easy to understand.
