Result oriented professional with experience in Software Engineering, Software Development, Application Support, Project Management, Change Management, Defect Management, Quality Management, Requirement Gathering, JavaScript, Data Structures, PostgresSQL, Cassandra, Maven

Work Experience

Altran Technologies as Software Engineer

Oct 2017 to Till Date

Cisco Hybrid Message

Hybrid messaging solution between Cisco Teams and Jabber

Worked on SIP federation extension feature to communicate with external federated domains.

Worked on User auditing, presence sync, isTyping sync etc.

(Gmail) extension for Cisco Unity Connection

interface (gmail) for accessing Voicemails

Design the architect for schedule syncing to/from Gmail.

Created plugin for Gmail to send voicemail.

Worked on in-reply, forward message.

Worked on Notification push from Gmail to Unity Connection

Call Experience Service (Auto Attendant)

Interactive Voice Response) Solution

Worked on initial POC to finalize the architecture while migrating Tropo services to Twilio.

Created a library that maps the instruction understand by Tropo to instruction that is understand by Twilio and vice versa.

Got kudos for creating efficient library.

Written Api for handling all Twilio requests.

Written Api to make the product more flexible so that other product or service can also use services provided by Auto Attendant.

Worked on OTP feature, with which user can login via OTP to access voicemails

Worked on sync strategy to sync message between exchange and unity connection.

Fixed bugs and written tools for escalation team for imitating performance load.

Developed VMO plugin for office 365, which is used for playing voicemail on outlook.
