Projects

Project Title: Decision Support Platform - Role Definition Certification

Client: Confluxsys

Nature of Employment: Full Time **Duration: Aug 2020 - Oct 2020 Project Location: Pune** Onsite / Offsite: Offsite

Role: Module Leader Team Size: 4

Skill Used: Sailpoint, Identity Access Management, Core Java, Spring, Apache Web Server, MS SQL, MySQL,

Postgresql

Role Description: Lead the complete project, starting from Research, Design, E2E implementation, Testing and

Production Support.

Duration: Aug 2018 - May 2020

Duration: Jun 2018 - Jul 2018

Onsite / Offsite: Offsite

Responsible for Research & Development on Certification Lifecycle in SailPoint and Explored SailPoint JAVA APIs for Certifications.

Project Details: Decision Support Platform runs in a scheduled manner and revalidates the Role Definitions. It is Role Composition revalidation. It revalidates if the Role should still contain the Entitlements and Capabilities which were added in the Role at a certain point in time. It uses Machine Learning and Rule Engine to assist the reviewer in taking appropriate decisions.

Project Title: Decision Support Platform Client: Confluxsys Private Limited Nature of Employment: Full Time **Project Location: Pune**

Role: Module Leader Team Size: 4

Skill Used: Sailpoint, IDM, JAVA, Spring Framework, Apache Tomcat, MS SQL Server, MySQL, Postgresql Role Description: Responsible for Research and Development in Sailpoint, Integration with Sailpoint for

Certifications of access.

Lead the complete project, starting from Research, Design, E2E implementation, Testing and Production Support. Project Details: Decision Support Platform runs in a scheduled manner and revalidates the access of the identities. It is a user access revalidation. It revalidates if the user still requires the accesses or accounts which were provided to the user at a certain point in time or if some user has any access which should not be present, for e.g. a Finance Manager should not have access of Developer. It uses Machine Learning and Rule Engine to assist the reviewer in taking appropriate decisions.

Project Title: Risked Based Approval **Client: Confluxsys Private Limited** Nature of Employment: Full Time

Role: Programmer Onsite / Offsite: Offsite Skill Used: Service Now, Glide API, JAVA, Collection Framework, Spring Framework, REST API

Role Description: Responsible for integration of CAG with Service Now, to design and implement the business processes (Workflow) in SNOW, implementation of library using java to communicate with SNOW, implementation of notification email script in SNOW.

Project Details: In the identity system most of the accounts or entities are on risk because they contain lots of business-critical data. Continuous Access Governance works as an approval engine intgerated with ServiceNow and communicate with IDM (Identity Management) System to update all the changes.

Project Title: Out of Band Access Change

Client: Confluxsys Private Limited Nature of Employment: Full Time

Role: Programmer

Duration: Apr 2018 - May 2018 Onsite / Offsite: Offsite

Team Size: 7

Skill Used: REST API, SNOW, Glide API, Workflow, Spring Integration, Collection Framework,

Role Description: Validation done in Service Now,Integration with SNOW by implementing a library which call the out of box APIs of SNOW to raise the attestation tickets and to raise the incidents, Designed the workflow to validate the attestation tickets raised in SNOW

Project Details: When an account gets access out of their limits, CAG found specious access then it raises attestation to the managers or other higher authorities to validate the access.

Project Title: Continuous Access Governance

Client: Confluxsys Pvt. Ltd. Nature of Employment: Full Time **Duration: Aug 2017 - Oct 2017 Role: Programmer** Onsite / Offsite: Offsite

Team Size: 8

Skill Used: Research and Development in Service Now, Used Spring Framework, Used micro service architecture, ? Developed scheduled jobs using QUARTZ to run some tasks periodically.

Role Description: Worked as a JAVA Developer,R&D in Service Now,Generic Library implementation (JAVA) for SNOW integration, Web Services implementation using Glide API close to Javascript in SNOW, Designed and implemented a Workflow (Business Process) in Service Now.

Project Details: : It is an identity governance solution for the access. It is a governance platform which continuously checks for access change in different applications account and found speciose account.
