6.8 years of professional experience in software development, technical solutions and project support.

- * Hands-on experience on Java and UI Technology.
- * Working in Agile environment.
- * Working as a Technology Analyst at Infosys.

Work Experience

Infosys Ltd. as Technology Analyst May 2014 to Till Date

Roles played: Trainee(through campus placement), Systems Engineer, Senior Systems Engineer, Technology Analyst (current Role).

Project details:

COVID Pandemic support project: High visibility Project in client organization with fast paced development and delivery with evolving requirements. Delivery for every two to three weeks to support the small business clients in applying loans. Built on Spring MVC and integrating with multiple teams via RESTful webservices, with an Angular Frontend. Used Oauth to secure end points, used executor framework to fetch data.

Financial Services Domain Project: Spring MVC project to develop dashboard and interface to access all apps provided by bank, the app was entry point to all apps in the bank for corporate banking. Lot of data from downstream apps must be presented in UI layer. Project Involved to get data via rest services and integrate with Angular, JSP Front end. Used Oauth to secure end points, used executor framework to fetch data.

Glassbox: A customer experience tool from Glassbox. Captures both client-side and server-side activity to replicate the client activity in browser. Helps in analytics, debugging and generating reports. Worked in integrating this tool with bank applications.

Mainframe Project: Mainframes technology project in a Banking client, legacy project managing the reward calculation, balances and interest calculations, generating reports, implementing business rules. Involved creation of Cobol programs and working with JCL, REXX and other mainframe tools.

Project responsibilities:

* Creating REST endpoints.

- * Building model, controllers and service, DAO layers.
- * Coordinating with different stakeholders.
- * Occasionally leading scrum call.
- * Test environment support and triage participation
- * Resolving test and production environment defects
- * Knowledge transfer sessions to new members.
