Summary

IT professional with significant work emphasis in Application development. Web applications with Spring boot, Java, J2EE ,E Commerce and Mobile and Integration systems with overall experience of around 6 years

Versatile experience in working on Health Care domain functionalities.

Sound knowledge on Open source tool, frameworks such as spring boot hibernate, jpa, spring and web services

Having good working experience in developing UI using JSP, Angular JS, JSON And JavaScript

Started working on Azure cloud for spring micro services deployments.

extensively worked in service oriented architecture development

proficient in developing microservices and deploying through azure cloud platform

Had extensive knowledge in azure cloud developer solutions and integrating with multiple microservices

End to end knowledge of the applications from User interface to Service integrations

Good exposure on web services(Soap and Restful) and spring batch framework

Work Experience

United Health Group (UHG) as Apps Developer -Java/J2EE

Mar 2015 to Till Date

Currently working on HAPI & Spring Boot rest services for applications.

Driving the teams in understanding the Pharmacy benefits management and health care functionality in interacting with external clients

Developed consolidated portal application by creating an exclusive framework by integrating React Js and Spring boot

Provided an approach for continues integration and continues delivery by using Jenkins which makes automatic builds with test cases and code coverage reports as well as deployments to dev and test environments, thus saving hundreds of hours per annum.

Gathering requirements from business for building consolidated portal from the scratch

Providing functional walkthroughs for the team members in understanding the catamaran integration.

Conducting code reviews, functional reviews for each sprint

Involved in cloud development work using OpenShift & Azure provider for developing the applications and publishing the

As part of webservice development delivered tasks generation of stubs for the SOAP based webservices, consuming the webservices through springframework template and configuring security headers.

Implemented multiple design patterns and strategus for login & registration capability

Worked closely with installing the certificates in jvm and jks trust files in order to handle the SSL configurations

Developed Restfull webservices for opportunity services module using Apache Cxf / Spring boot

Designed security vulnerability approach for cross site scripting(XSS), cross site request forgery(CSRF) Intruder attacks which is my key achievement in this project

Designed Technical approach for Payment optimization, Low cost alternatives by following agile development for OptumRx that provides retail pharmacy network.

Involved in developing the members dashboard pages, online ordering medicine account including the business functionality for the CHP Portal System that will be able to display the member's total LCA (low cost alternative drugs) and RMO(Retail to Mail Opportunities) savings amount on the member's Account by using spring mvc, ajax, jquery and soap

Created a technical docs for the Conversion of Data base calls to Web services and implemented the same in Client portal project

Involved in scrum meetings for project deliverables like checkout deliveries used and enhanced to assist member to either Transfer his Medication to Mail Service (RMO - Retail To Mail Offer) or Switch his higher cost Medications to a lower cost alternative

Troubleshooting issues for deployment and migration activities

Education

UG: B.Tech/B.E. (Electronics/Telecommunication) from Jawaharlal Nehru Technological University (JNTU) in 2013
