

Software Engineer seeking roles in Project Management, Software

Development, Requirement Gathering, Production Support, Unit

Testing, Coding, Debugging, Oracle, Spring Mvc, Spring

Boot, Hibernate, Java, Log4j, MySQL, Javascript, JSON, Web Services, REST API, java

Current Location: Pune Total Experience: 7 Year(s) 0 Month(s)

Pref. Location: Mumbai,Pune Highest Degree: M.Tech [Computers]

Functional Area: IT Software - Application Programming /

Maintenance

Role: Software Developer

Industry: IT-Software/Software Services

Marital Status: Married

Key Skills: Software Engineer, Software Development, Production Support, Oracle, Spring Mvc, Spring

Boot, Hibernate, Java, MySQL, Javascript, JSON, Web Services, REST API, Unit

Testing, Mongo DB, Postgresql, Postgres, github, bitbucket

Verified: Phone Number | Email - id

Last Active: 21-Jan-21 Last Modified: 21-Jan-21

Summary

Having 7 years 4 months of significant exposure in building large-scale enterprise applications & object-oriented design, developing core modules, Code Review, and Post Implementation support efficiently on Java based technologies Strong understanding of Core JAVA, Multi-threading, Collections API, Spring/Spring Boot, RESTful web services, Hibernate.

Work Experience

TransPerfect Solutions Pvt Ltd as Software Engineer

Aug 2013 to Jan 2021

Project Details

Project 1

Salesforce Knowledge Integration with GlobalLink Connect cloud [GCC]

Tools/Technologies

Technologies: Java, REST API/web services, jdk 1.8, Spring-MVC, spring-

Boot, Hibernate,

Tools: Apache Maven, Tortoise SVN, MongoDB, Postman, Swagger

Description

The GlobalLink plugin[GCC] is an extension to the client content system and

Provides the capabilities to send and receive content for translation. Business users can select the items

(pages/products/articles etc.) that they want to be translated and start a translation submission.

The GlobalLink connect is a Salesforce connected app which is installed within your salesforce instance. It uses the out of box translation queue feature for Salesforce Knowledge to get knowledge articles translated in GlobalLink. This product is built using Spring Boot

Roles & Responsibilities

Responsible for configuration salesforce instance for Knowledge.

Responsible for creating queues for assigning articles.

Responsible for configuring connected App.

Responsible for changing the spring MVC code implementation to spring Boot.

Maintenance of application, Support, Bug-fixing

Project 2

Salesforce Knowledge Adaptor

Tools/Technologies

Technologies: Java, REST API/ web services, jdk 1.7 ,basics of Spring, spring-

Boot, Hibernate,

Tools: Apache Maven, Tortoise SVN, MongoDB, Postman, Swagger

Description

The GlobalLink connect is a Salesforce connected app which is installed within your salesforce instance. It uses the out of box translation queue feature for Salesforce Knowledge to get knowledge articles translated in GlobalLink. Business users make a translation request within Salesforce Knowledge which is assigned to a Salesforce user queue called GlobalLink. GlobalLink Connect for Salesforce is a cloud hosted application which periodically polls Salesforce Knowledge and exports articles flagged for translation from Salesforce into a XM file. These XML files are uploaded to GlobalLink where a translation workflow is initiated. On completion of the translated workflow, the translated content is automatically updated back into Salesforce using the REST API. After successful updates of translated content in Salesforce, the user can progress the Salesforce translation workflow and assign the article to the configured reviewer.

Roles & Responsibilities

Responsible for configuration salesforce instance for Knowledge.

Responsible for creating queues for assigning articles.

Responsible for configuring connected App

Sometimes work on UI layer like validation using JavaScript.

Project 3

Marketo (Translation Adaptor)

Tools/Technologies

Technologies: REST API/ web services, jdk 1.7, Core Java, Spring, Hibernate, JSP,

MySQL database, AJAX, JQuery HTML, Java Script.

Tools:IDE - Jenkins, SonarQube, BuildTool ?Maven Postman, Bitbucket, SVN

Description

Marketo is a customer relationship marketing system. The GlobalLink Marketo adaptor identifies marketing content, including dynamic content for translation, as per the rules set up in Marketo. The adaptor then sends content to GlobalLinkProject Director for translation. Content is sent and returned automatically or manually.

Roles & Responsibilities

As part of API team, developed endpoints for complex API?s using Spring Boot.

Handling critical issues which involved gathering client requirements, DB design, documentation and its related implementations

Bug-fixing, defect tracking for every release and reviewing source code for peer developers.

Deploying the code to different environments including Unit and Integration testing in IT and QA.

Ownership of modules like exception management, providing solution and timely delivery.

Education

UG: B.Tech/B.E. (Computers) from Rajiv Gandhi Proudyogiki Vishwavidyalaya (RGPV), Technocrats Institute of Information Technology in 2008

PG: M.Tech (Computers) from Indira Gandhi National Open University (IGNOU), International Institute of Information Technology in 2013

IT Skills

| Skill Name | Version Last Used Experience |
|---------------------------------------|------------------------------|
| Eclipse Kepler, Juno, Luna, Core Java | |
| SVN, JIRA bug tracker, Beyond Compare | |
| Maven, Baretail, Bitbucket | |
| Servlet, JSP, Spring MVC | |
| JavaScript, JQuery, XML, AJAX | |
| Spring 3.0,Spring Boot | |
| Hibernate 3.3 | |
| Tomcat 8.0 | |
