

Software Engineer seeking roles in Software Development Life Cycle, Project Management, Requirement Gathering, Requirement Analysis, Design Implementation, Stakeholder Management, Unit Testing, Application Migration, Team Management

Current Designation: Software Engineer Total Experience: 4 Year(s) 1 Month(s)

Current Company: Pointcross.com Pvt. Ltd Notice Period: 1 Month

Current Location: Bengaluru / Bangalore Highest Degree: B.Tech/B.E. [Instrumentation]

Pref. Location: Bengaluru / Bangalore, Mumbai, Pune Functional Area: IT Software - Application Programming /

Maintenance

Role: Software Developer

Industry: IT-Software/Software Services

Marital Status: Single/unmarried

Key Skills: Software Engineer, Software Developer, Software Development Life Cycle, Project Management, Requirement

Gathering, Requirement Analysis, Design Implementation, Stakeholder Management, Unit Testing, Application

Migration, Team Management

Verified: Email - id Phone Number |

Last Active: 21-Jan-21 Last Modified: 21-Jan-21

## Summary

Computer Science Engineering Professional, with nearly 4 years of diversified experience in Software Development and related operations Expertise in Software Development Lifecycle (SDLC) right from requirement analysis, documentation (functional specifications, technical design), coding and testing (preparation of test cases along with implementation) to maintenance of proposed applications Excellence in gathering and analyzing data in support of test cases, writing test plans for tracking defects & fixes in product development, software application development, information systems & operations systems Successfully managed the development of software products from requirement analysis to system study, designing, coding, testing, debugging, documentation, implementation and maintenance Developed Complex database objects like Stored Procedures, Functions, Packages and Triggers using SQL and PL/SQ

# Work Experience

Pointcross.com Pvt. Ltd as Software Engineer

Dec 2016 to Till Date

Key Result Areas:

Building, testing and deploying variety of scalable, highly available and modular software products

Identifying documents related to components and conducting detailed study of the same as per the product changes, by getting in touch with the product developers

Managing client/user interaction for requirement gathering, risk assessment, finalization of technical architecture and discussions for effort/cost/time estimation

Writing and implementing scripts to enhance user experience

Promoting API development and upgrading the current system

Mapping client's requirements & providing them best solutions involving evaluation & definition of scope of project and finalization of project requirements

Administering timely completion & delivery of project to the client and extending production support to multiple applications

1/22/2021

Ensuring that all activities and deliverables associated with the project are coordinated and completed on time, in adherence to the Software Development Framework (SDF) and Software Quality Assurance (SQA) Processes Designing, developing, testing, troubleshooting and debugging the applications

Collaborating with cross-functional team to discuss and understand software requirements and design/implement flow Conducting continuous self-code/DB review, bug fixing and performance tuning to make the application robust

Following agile based SDLC, including daily stand-ups with client using voice/video and text

Managing various technical aspects like software design, coding of modules, monitoring critical paths & taking appropriate actions and end-to-end release process

### **Education**

UG: B.Tech/B.E. (Instrumentation) from Manipal Institute of Technology (MIT) in 2014

Other Qualifications/Certifications/Programs:

Diploma in Advanced Computing
