monthly dashboard, project health check metrics and weekly & fortnightly status reports as well as extending postimplementation support to team members by identifying defects, inconsistencies & errors

Title: ADOPT
Client: AT&T, USA
Period: Since Jul'15

Lang. & Tools: Spring (Core, MVC), Oracle 11g, SQL, PLSQL, Hibernate 3.0, JSP, HTML, CSS, Ajax, JavaScript, JSTL, Tiles, POI 3.0, Log4j 1.2, Junit, Apache Tomcat 5.5, Toad for Oracle and Eclipse

Description: ADOPT is a future mode of operations application in sales automation. ADOPT guides client's Account Executive to complete the design / price / propose their sales process. It allows Account Executives to initiate the service order.

Key Result Areas:

- * Working as Java & Database Developer
- Learning about requirements, preparing & implementing the design and performing unit & assembly testing
- * Resolving production / live deal issues raised by the users
- Performing several DBA activities like database space check, hung session checks
- * Refreshing the mock database with latest production data so that developers can work on the production / live deal issues raised by testers / users

Title: TRM

Client: BMW, North America Period: Feb'15-Jun'15

Lang. & Tools: Struts 1.2, EJB 2.0, JPA, DB2, JSP, HTML, CSS, JavaScript, JSTL, Tiles, JUnit, Glassfish 3.1.2 and Ant Description: TRM involved applications which were using WebLogic 12. Application was migrated from WebLogic 12 to Glassfish 3.1.2 so that all the applications were required to be maintained with Glassfish 3.1.2.

Key Result Areas:

- * Tested all the applications to ensure that they should behave as expected
- * Documented Java level changes while migrating the applications to Glassfish

Title: Showback

Client: Catlin Insurance, UK Period: Oct'14-Jan'15

Lang. & Tools: Spring MVC 2.x, Hibernate, JavaScript, Ajax, JSP, CSS, JUnit, Maven, SQL and SVN

Description: The basic objective of Showback application was to develop web based solution that would facilitate management with master data, budget forecasting & financial report through a graphical user interface (GUI). It would remove the inefficiencies and reduce the risk of errors while creating the same through manual process (using Excel).

Key Result Areas:

- Executed business logic using technologies like Spring MVC, Hibernate and JSP
- * Wrote JUnit test cases for DAO methods

Title: Shout

Client: Catlin Insurance, UK Period: May'14-Sep'14

Lang. & Tools: Spring MVC 2.x, Hibernate, JavaScript, Ajax, JSP, CSS, JUnit, Maven, SQL and SVN

Description: The Claims Shout was a global process which was used to alert key people in the business when a potential high claim might occur. The communication was internal to Claims Department and other departments within Catlin.

Key Result Areas:

- * Gathered enhancement requirements by interacting with client
- * Executed enhancement requirement required by client

Education

UG: B.Tech/B.E. (Computers) from SRI VENKATESHWARA COLLEGE OF ENGINEERING in 2013
