MEAN Stack Developer seeking roles in Software Development, Application Programming, Application Maintenance, Project Management, Requirement Analysis, Solution

Architecture, C, C++, Java, Typescript, Mongo DB, MySQL, HTML, Angular, Node JS, Redis

Server, Android

Current Designation: MEAN Stack Developer

Current Company: Bostonlogix

Current Location: Hyderabad / Secunderabad

Pref. Location: Bengaluru / Bangalore, Chennai, Hyderabad Functional Area: IT Software - Application Programming /

Maintenance

Role: Software Developer

Industry: IT-Software/Software Services

Marital Status: Single/unmarried

Key Skills: MEAN Stack Developer, Software Developer, Software Development, Application Programming, Application

Maintenance, Project Management, Requirement Analysis, Solution

Architecture, C, C++, Java, Typescript, Mongo DB, MySQL, HTML, Angular, Node JS, Redis Server, Android

Verified: Phone Number | Email - id

Last Modified: 21-Jan-21 Last Active: 21-Jan-21

## Summary

A well-qualified individual with B Tech in Computer Science Engineering, accented with the latest trends and techniques of the field, determined carve a niche in the industry.

Sound understanding of all phases of Software Development Life Cycle (SDLC), creating new software &systems, designing, analysis, testing, database development and coding for modules.

Secured State-wide 60th rank in intermediate 1st year board examination and awarded with MHRD Scholarship, received the Best Student Award in 2nd year of Engineering.

Comprehensive problem solving abilities, ability to deal with people diplomatically, willingness to learn, team player, hard worker with good communication skills and been a part of team-mentoring activities.

# **Work Experience**

Bostonlogix as MEAN Stack Developer

Apr 2017 to Till Date

Involved in conceptualization, project management and development of the product Concerto using Visual Studio. Developed Node JS API Services and UI in concerto application.

Roles & Responsibilities: Understanding the requirements of the project, Designing and developing as per Client Requirements and Bug Fixing.

**Projects** 

Concerto

Concerto is primarily used by marketing, sales, manufacturing, and procurement, to collaborate with product development. Enables users to define guidelines, rules, and limitations for specific markets. This module also dynamically checks formulas against these guidelines during development and alerts the user of potential violations.

Formula Management Manage all of user formulas to meet specifications based on available raw materials. Set parameters using a matrix to generate the most optimum and cost-effective formula possible.

Label Development Create, view, and edit all of the content that's associated with product labels from a central repository. Enables users to define guidelines, rules, and limitations for specific markets. This module also dynamically checks formulas against these guidelines during development and alerts the user of potential violations.

### **ISECURE PAYMENTS** as Android & NodeJS Developer

May 2014 to Apr 2017

**Projects** 

**ISecure Restaurants** 

Specially designed for the hospitality industry to enable the customer from reserving the table to payment. It offers the design on the restaurant contains tables, decorations and themes. After the Design, the user can book the table, Select the items and continue the payment.

#### **ISecure Payments**

Designed for payments. Enables online transactions through payment gateway linked with merchants accounts. Accept credit cards on Android Phones, Tablets touch with the Card Reader. The iSecure's payment Gateway can help you accept credit card and electronic check payments quickly and affordably

Converted all the Dot Net Service to NodeJS and using My SQL as database

#### il earnNet

An application that controls the modern technology to send the best learning experience for kids

#### **ISecure Wallet**

ISecureWallet is a simple way to transfer money, receive payments and to discover restaurants, spas, gyms, movies, hotels and activities around the location, buy offers and deals from them and have a wonderful experience when they visit

### **Education**

UG: B.Tech/B.E. (Computer Science and Engineering) from Gayatri Vidya Parishad college of Engineering in 2014

### IT Skills

Skill Name	Version	Last Used	Experience	
ANDROID		2016	1 Year(s) 8 Month(s)	
Node.js	6.3.1	2019	3 Year(s) 0 Month(s)	
AngularJs	8.2.5	2019	0 Year(s) 6 Month(s)	
Mongodb	3.0.6	2019	2 Year(s) 0 Month(s)	
TypeScript				
MySQL				
HTML, Angular				
Redis server				

## Languages Known

Language	Proficiency	Read	Write	Speak
English	Proficient			
Telugu	Expert			

## **Projects**

Project Title: Concerto Client: Johnson & Johnson Nature of Employment: Full Time Project Location: Hyderabad Role: Sr. Programmer

Duration: Apr 2017 - Till Date Onsite / Offsite: Offsite

Team Size: 6

Skill Used: Node.Js, Angularjs, Bootstrap, Mean Stack,

Project Details: Concerto is primarily used by marketing, sales, manufacturing, and procurement, to collaborate with product development.

Enables users to define guidelines, rules, and limitations for specific markets. This module also dynamically checks formulas against these guidelines during development and alerts the user of potential violations.

Formula Management Manage all of user formulas to meet specifications based on available raw materials. Set parameters using a matrix to generate the most optimum and cost-effective formula possible.

Label Development Create, view, and edit all of the content thats associated with product labels from a central repository. Enables users to define guidelines, rules, and limitations for specific markets.
