- Responsible for Branching & Check in Permissions.
- Responsible for Merge & Check in Permissions.
- Working as a Repository Admin & Deployment Manager.
- Working on UNIX Shell Scripts.
- Debugging build failures, coordinating with developers and testers to resolve related issues.
- Effective Subversion (SVN) repository maintenance (Create tags, branches, merging etc.). Code version maintenance

1/21/2021 https://freesearch.naukri.com/preview/printResume?uname=fe4ee0c208578924d8f729402daa12435b595c521e145d470a1449585e...

across several branches.

- Developing Ant, Gradle, Python scripts to automate the compilation, deployment and testing of Web and J2EE applications to the above platforms.
- Production Deployment for monthly releases for the Client in JBOSS and Web-Sphere.
- Daily build and configuration across all the environments like Dev, CIT, QA, Perf, PRL.
- Hands-on on Incident Management tools like Service Now.
- Automated the build process of a Java Client/Server product for parallel builds of multiple versions on multiple platforms using Ant, Gradle, Jenkins tools, and UNIX scripting.
- Worked on the Configuration Deployment tool to migrate the Configuration changes from CIT to Production.

Nokia Softwares as Software Engineer

Jul 2018 to Aug 2019

PROJECT NAME: Sysco US Client

Environment :Unix , Shell Scripting, Tortoise SVN, Git, Jenkins, Maven ,AWS, deployment on Web logic server

Software Configuration management (Automate CI & CD pipe using Ansible, Maven, Jenkins & Responsibilities GIT).

- Configured Jenkins Jobs install plugins for generating Project artifacts.
- Responsible for tagging and maintain code on version control GIT.
- Responsible for creating Builds and Deployments.
- Automate the build Process Using Jenkins jobs.
- Experienced with working on Puppet Master and Puppet Agents. Defined Puppet Master and Puppet Agents to manage and configure nodes.
- Designed and deployed AWS solutions using E2C, S3, RDS, EBS, Elastic Load Balancer, Auto scaling groups, Opsworks.
- Configured and monitored distributed and multi-platform servers using Nagios.
- Configured S3 versioning and lifecycle policies to and backup files and archive files in Glacier.
- Integration of Automated Build with Deployment Pipeline. Currently installed Chef Server and clients to pick up the Build from Jenkins repository and deploy in target environments (Integration, QA, and Production).
- Implemented and building tools such as Ant/Maven in order to automate and enhance the overall operational environment.
- Verify Deployments logs to check for successful deployments.
- Perform deployments to multiple environments like Dev, QA and UAT environments.

Education

UG: B.Tech/B.E. (Electronics/Telecommunication) from G Pulla Reddy Engineering College, Kurnool in 2016

PG: MCA (Computers) from Manipal Academy of Higher Education (MAHE) in 2019
