Total Experience: 4 Year(s) 6 Month(s)

Notice Period: 3 Months

Highest Degree: B.Tech/B.E. [Electronics/Telecommunication]

Senior Java Developer at Mindtree having 4 years 5months of experience in Java, SQL and Data Structures & Algorithms.

Current Designation: Senior Software Engineer

Current Company: Mindtree Limited
Current Location: Bengaluru / Bangalore
Pref. Location: Bengaluru / Bangalore

Functional Area: IT Software - Application Programming /

Maintenance

Role: Software Developer

Industry: IT-Software/Software Services

Marital Status: Single/unmarried

Key Skills: java,sql,unix,linux,core java,junit,mysql,html,css,sdlc,git,maven,oops,object oriented design,Software

Development, IntelliJ Idea, Eclipse, Gradle, Data Structures, Algorithms

Verified: Phone Number | Email - id

Last Active: 20-Jan-21 Last Modified: 8-Jan-21

Summary

Senior Java Developer at Mindtree having 4 years 5months of experience in Java, SQL and Data Structures & Algorithms.

Work Experience

Mindtree Limited as Senior Software Engineer Sep 2018 to Till Date

Worked on software applications using Agile practices like Test Driven Development, Pair Programming, Continuous Integration, and Continuous Deployment.

Education

UG: B.Tech/B.E. (Electronics/Telecommunication) from Visveswaraiah Technological University (VTU) in 2015

Projects

Project Title: WRAN Configuration Management

Client: ERICSSON

Nature of Employment: Full Time Duration: Nov 2015 - Sep 2017
Project Location: Bangalore Onsite / Offsite: Offsite

Role: Programmer Team Size: 10

Skill Used: Core Java, DBMS, MySQL, UNIX

Role Description: > Worked as a Developer and played a vital role in automation of Network Process of Nodes.

> Worked effectively with the design team to ensure software solutions, elevated client-side experience.

Project Details: Worked on Telecom Project owned by Ericsson, OSS-RC which manages Network Elements in the core and access networks for LTE, WCDMA and GSM domains. It involves many applications in which I have worked in few products like RTR (Radio Tool for Reparenting), NSA (Node Status Analyzer) and WCC (WRAN Consistency Check).

- > RTR: RTR is a WCDMA RAN application. Basically, this application is used for Reparenting WCDMA nodes. Reparenting an RBS is defined as moving the traffic control of an RBS from a source RNC to a target RNC.
- > WCC: Consistency Check verifies the nodes are either consistent or not in the network using Java, JDBC, and SQL. Consistency is checked by running rules written in SQL against the Network Elements.
- > NSA: NSA application is designed for fast identification of problem areas in the Radio network. It presents the entire node status information in one GUI, which should point the user in the direction of the area causing the service degradation.
