Track9 devices are specially curated to ensure that were providing our customers with the latest and best technology on the market. Track9 tracker is portable battery-operated devices that can be stowed in a backpack, professional fleet tracking devices that are hardwired to the vehicle, satellite trackers that can monitor the location of heavy equipment in the field or shipping containers at sea.

Project Title: Test Motors SmartSoft App

Client: TestMotors

Nature of Employment: Full Time Duration: Jan 2018 - Jan 2019
Onsite / Offsite: Offsite

Project Details: The Test Motors SmartSoft app is a tool for users to configure Smart Motor Sensor (SMS) from Test Motors, check motors condition, receive alarms and visualize the motors real-time data. Its main functionalities are:

Configure the Smart Motor Sensor (SMS) sensors to connect to a Wi-Fi access point.

Add new motors with SMS sensor in the account.

Check the motor parameters and condition.

Receive alarms, in advance, when there are faults in the motors.

Plot the signals captured by the sensors and also the data generated by the system: operation parameters, vibration RMS, time waveform and FFT.

This application is a part of the Test Motors tools, which is a predictive maintenance system oriented to the electric motors condition monitoring. It allows detecting motor failures in advance, introducing electric motors to the IoT world.
