Work Experience

Virtusa Consulting Services Pvt Ltd as Senior Consultant

Feb 2020 to Till Date

Client CITI Bank, UK

TechFacE - Technical Assessment Evaluation Title#1

Designation Senior Consultant Duration Since Jan 2019

Description This project is to define the requirements for this E2E process, and develop, and implement a unified Web based system as a single capture and processing platform within CITIs intranet environment. The new system will need to be developed using the latest Citi standard technologies, and will be rolled out globally for use. This project will help CITIs Corporate Realty Services group to have an automated solution for their Technology site (also called TechFacE) assessment requirements.

Environment MVC 4, C#, WCF, Jquery and SQL Server.

Responsibilities Requirements gathering, Business Analysis and functional specs analysis provided by Business and created low level design specs for all mappings.

- Team Handling in all phases of development.
- Analyze, develop and Unit testing.

Polaris Consulting and Services Ltd. as Team Lead

Jan 2010 to Jan 2020

Client CITI Bank, UK Title#2 **Activity Dashboard** Designation Senior Consultant Since Oct 2017 Duration

Description eTracker Activity Dashboard is a web-based tracking system for recording and tracking global archiving activities (which are audited by Citi) and tracks the status of activity cycle jobs for four regions (91 countries). This system allows clients to submit new activities and view the status of activity cycle jobs in dashboard graph. This site helps the country and region leads to communicate the all archiving requirements, deadlines by email and notes.

Environment Angular 7, Typescript, Web API, Entity Framework and SQL Server.

Requirements gathering, Business Analysis and functional specs analysis provided by Business Responsibilities and created low level design specs for all mappings.

- Managed all phases of development.
- Module Development and Unit testing.
- Developed Notes and Email Notification Configuration modules, Notification module is to send mail to customer for reminder.

Client CITI Bank, UK

Title#3 FLS Online(Fire Life System)

Designation Senior Consultant

Duration Since Jan 2015

Description The Fire Life Safety Risk Management Process represents the processes that are undertaken to ensure that the requirements set out in the Citi Security and Fire Safety Policy are either fully complied with or exceptions have been granted where appropriate. Whilst the policy itself is owned by CSIS and final responsibility ensuring compliance remains CSIS jurisdiction, Fire Life Safety (FLS) elements of the policy are subject to compliance review by the Regional Risk Manager before submission to CSIS.

Environment MVC 4, C#, Entity Framework and SQL Server.

Requirements gathering, Business Analysis and functional specs analysis provided by Business Responsibilities and created low level design specs for all mappings.

- Managed all phases of development.
- Analyze, develop and Unit testing.
- Developed landing pages across the application, Excel reports and Notification module to send mail to customer.

Client

CITI Bank, UK

Title#4 HSCRS (Health and Safety)

Designation Senior .Net Consultant

Duration Feb 2013 - Dec 2014

Description Health and safety corporate realty services (HS&CRS) application is software designed to report all FLS Accidents, incidents and near misses in CITI Any Employee can report an accident, an incident or a near miss for themselves or their colleagues. Upon completing the form, an automatic notification will be generated and notified to relevant officers including: Building Managers / Safety officers and FLS coordinators plus Legal department, as appropriate, to investigate the issue and act accordingly. The HSCRS also records, monitors and tracks all accident, incidents or near misses in CITI workspace. This information is collected and analyzed to understand the reason why the accident happened and, where possible, implement corrective actions to help avoid similar accidents happening in future. Moreover, through the HSCRS, HR can notified of any accident, incident or near miss that has logged. HSCRS can also be used to manage FLS team trainings (physical and online) and people needs registration. Finally this application allows the Fire Life Safety team to perform their reporting and management obligations as it facilitates the tracking of fire drills, annual safety audits and Fire Warden Checklists Online. This Application is used worldwide by CITI

Environment ASP.Net, C# and SQL Server.

Responsibilities Requirements gathering, Business Analysis and functional specs analysis provided by Business and created low level design specs for all mappings.

- Developed and Managed Inquiries module.
- Prepared checklist for code peer review.
