Summary

Full Stack Developer specializing in Front-end and Back-end development. Well-versed in numerous programming languages including HTML, CSS, JavaScript, React JS, Java, spring boot and SQL. Looking for a platform where I can showcase my technical skills and contribute towards the mission and vision of the organization.

Work Experience

Empower Retirement as Software Developer

Mar 2018 to Till Date

Reforecast Report

The project aims end to end flow which exposes a new Rest API for retrieving the data from 3 other existing back-end services and database. Wrapped the response. Considering the response time implemented multithreading for processing in parallel and develop a web page to show the data in tabular format and a button to export the data in a pipe delimited format.

Save Custom Strategy

The React JS project aims to develop a enrollment web page were the users can enter few details in the input box and select details from the dropdown and a submit button, on click calls rest API service passing the data in request body to save into database.

MA Terms of Service

The Spring-boot project aims to expose a new Rest API end point for retrieving the data from database. Generated DTO and VO object using raml, written business logics as per the product requirement and written Junit for coverage. Involved in writing new SQL queries. The application is packaged via docker container and deployed to AWS cloud using Jenkins.

Education

UG: B.Tech/B.E. (Computers) from BMS College Of Engineering, Bangalore in 2018
