Software engineer with 2 years 11 months of experience translating business requirements into technical solutions; from application development and enhancement to training and maintenance.

Work Experience

Yamaha Motor Solutions as Software Engineer Jan 2018 to Nov 2020

Developed multiple projects focusing on Yamaha Motor business for both B2B and B2C business domains across continents.

- * Part of Dev team for the company, responsible for development of multiple modules and projects from scratch.
- * Utilized software engineering skills to develop products throughout the software lifecycle to boost business efficiency, from requirement definition - system mapping - estimation- development to delivery.
- * Developed and maintained projects and modules for overall business of Yamaha Motor Mexico & Yamaha Motor Indonesia.
- * Techno- functional consultant for finance and operations.

Projects

Yamaha Motor Mexico

- ? Tech Stack: ASP.NET, MSSQL, JS, Dynamics AX
- * Developed and maintained end-to-end modules for Yamaha Motor Mexico Dealer interface using ASP.NET, MSSQL, SharePoint.
- * Efficiently analyzed client's requirement and developed effective mapping specifications in accordance with existing system.
- * Provided prompt solutions and proactive troubleshooting support to swiftly resolve subtle and complex issues with remote team.
- * Effectively trained clients and other business users for system usage with thorough demonstrations and manuals.
- * Documented all systems & applications to train new team members.

Yamaha Motor Indonesia

- ? Tech Stack: ASP.NET, MSSQL, JS, SharePoint
- * Developed from scratch Data Management System for Yamaha Indonesia that reduced client's dependency on legacy systems.
- * Developed & maintained existing Dealer Interface to fit with custom changes throughout the system maintenance phase
- * Assisted senior consultant in developing estimations & technical mapping for extending business logic within existing back-end services.
- * Developed initial stage B2C product for Yamaha Motor Indonesia targeting end user clientele in Indonesia using ASP.NET, MVC Framework and MSSQL.
