TIBCO Developer (6 yrs exp.) available to join immediately, seeking roles in Design and Development of Project using TIBCO BW Container Edition, TIBCO BW 6.x and TIBCO BW 5.x, TIBCO Admin, TIBCO EMS, Agile, Jenkins, Python, GIT, Jira, Angular

Current Designation: TIBCO Developer - Consultant Total Experience: 6 Year(s) 0 Month(s)

Current Company: HCL Technologies Ltd Notice Period: 15 Days or less

Current Location: Noida Highest Degree: B.Tech/B.E. [Electrical]

Pref. Location: Bengaluru / Bangalore, Noida, Pune

Functional Area: IT Software - Application Programming /

Maintenance

Role: Software Developer

Industry: IT-Software/Software Services

Marital Status: Single/unmarried

Key Skills: TIBCO/Software Developer, Requirement Gathering, Application Support, Agile

Methodology, Jenkins, Python, JIRA, TIBCO BW, TIBCO Designer, TIBCO Administrator, EMS, Adb Adapter, Business

Works, TIBCO EMS, TIBCO BW Container Edition, TIBCO BW 6.X, Angularis, Apigee

Verified: Phone Number | Email - id

Last Active: 18-Jan-21 Last Modified: 18-Jan-21

Summary

- * 6 years of working experience as a developer in TIBCO products such as TIBCO Business Works 5.x, TIBCO BW 6.x, TIBCO Business Works Container Edition (BWCE), TIBCO Enterprise Messaging Service (EMS) and TIBCO Administrator.
- * Worked in design and development using SOAP, REST, HTTP, Notify, ADB and EMS.
- * Extensive working knowledge in Palettes like HTTP, Service, File, JDBC, JMS, Mail, Parse, SOAP, REST, WSDL, XML and General Palette.
- * Good working knowledge of SOAP UI testing, Jenkins (Deployments), Jira, FileZilla, PuTTY, Rally, GEMS (EMS Monitoring tool), Postman, Splunk etc
- * Little familiar with APIGEE, Spring Tool Suite (Spring Boot), Angular 8, Python and some of the programming languages and its concepts, such as C, Java
- * Basic knowledge on UNIX and PL/SQL.

To work in an exciting and professional environment with continuous learning, development and growth possibilities, and an opportunity to learn and to apply my skills for the growth of the organization.

Work Experience

HCL Technologies Ltd as TIBCO Developer - Consultant Jul 2018 to Till Date

Project 1:

Client: T-Mobile- U.S

Domain: Telecom (Banking/Finance modules)

Role: Developer Team Size: 3

Description: Worked under Digital Integration Centre of Excellence (DICE)-Financial Management System (FMS) team which mainly handles financial transactions for T-Mobile, through credit card, bank account for various types of cards like Visa, Master, American Express etc. Also got opportunity to implement JWT functionality to secure transactions. Technically, we implemented above functionality in both TIBCO BW and TIBCO BWCE. Also worked a bit on spring boot user stories.

We had developed apps to handle various payment specific functionalities like Schedule Payment, Payment History, Payment Methods, Bill Reprint, Account Balance, Account Details, Pending Transactions, Validate Payment Method, Bill Summary, Handset Info, Receipt, Insatallment, Update Payment Status, Authorise Credit Card, Refund Payment, Validate Coupon, Tax Quote etc

U2 Migration

Migration of TIBCO BW code to TIBCO BW CE Applications.

Responsibilities:

Attending Sprint Planning and Back Log refinement to understand the requirement shared over JIRA or Rally, provide user story points, check the feasibility of developing within estimated duration and provide technical inputs during discussion

Utilizing daily stand up calls to update the status and discuss challenges faced.

Branching out code from latest production version code to proceed with development.

Developing based on technical functionalities and following development guidelines and Performing functional testing to check the stability while development.

Demo at the end of the Sprint to showcase the working functionality, validated against Acceptance Criteria.

- ? Performing End to End integration testing in ILAB
- ? Supporting QLAB testing and resolving defects if any.

Value Addition:

Created an App using Angular 8, Node JS, Mongo DB and data gathered for fixing TIBCO issues(both runtime and design time issues), using which any TIBCO developer can quickly get the solution for the issues by just searching with the error Key words. Later on it became a common pool to gather solutions by all TIBCO developer which saved the time in debugging issues significantly.

Tata Consultancy Services Ltd as TIBCO Developer, System Engineer Feb 2015 to Jul 2018

Project 2:

Client: Telia Company - Sweden/Finland

Domain: Telecom Role: Developer Team Size: 10 Description:

Global Enterprise Service Bus(GESB) project enables integration of various internal systems within Telia or external systems wishing to connect with Telia. Project comprises of a Scrum team of 9-11 members and team participates in all the scrum activities like Sprint Planning, Daily Scrum, Sprint Review & Retrospectives and Release Planning. Deliveries to production are focussed on every week based on project needs with a Handover to support team.

Responsibilities:

Responsible for gathering the requirements and providing the inputs on technical discussion.

Analyze the requirements and check the feasibility of developing within estimated duration.

Break down the requirements into user stories and create a Jira ticket for development in Sprints.

Branching out code from latest production version code to proceed with development.

Developing based on technical functionalities and following development guidelines and Performing functional testing to check the stability while development.

End-End integration testing involving different systems in SIT and UAT.

Project 3:

Client: Vitality Health(U.K) Domain: Insurance Role: Developer Team Size: 5 Description:

Worked as a developer for two teams HEAL and NERP, where HEAL was handling the functionality of servicing the policy, New business, renewal etc and NERP(Notification Engine Replacement program) was handling the document generation part for Bonds. Invoice, Bills etc and deliver the documents to different modes like Mail, Post, SMS and Fax. This project helps Vitality Health's customer to generate their document through Notification Engine Replacement program. Vitality Health's customer documents are generated by the Discovery SA Notification Engine (NE). NE generates the documents on-demand, based on XSLT templates developed by Discovery SA resources. The contents to be populated in the documents are provided by TIBCO services which retrieve the information from upstream applications like Heal/Online/ Papillon.

Vitality Health would like to build an in-house customer communications management (CCM) capability to remove the dependency on the Discovery SA NE, Interactive Messaging (Document Management) system and Discovery SA development resources. This initiative is called as Notification Engine Replacement program.

Responsibilities:

Understanding the requirement based on the design documents shared.

Involved in low level design documentation and high-level design documentation.

As a team member involved in design and development of the service layers and documentation of the same. Involved in configuration and deployment of web services using TIBCO Administrator and carrying out bug fixes and trouble shooting.

Developing based on technical functionalities and following development guidelines and Performing functional testing to check the stability while development.

Supporting testing in SIT and UAT.
