Last Active: 20-Jan-21 Last Modified: 20-Jan-21

Summary

Energetic and Enthusiastic person seeking to obtain a position that challenges and provides me the opportunity to learn, while allowing me to grow professionally more.

- 1 year 7 months of IT experience as Software Engineer building SPAs (Single Page Applications) under Linux, window and mac environment.
- * 6 months experience as an Application Developer contributing and working under many teams and projects.
- * 9 months experience as Content Manager in the Digital Platform.
- * 2 months of internship as a Content Development Associate.
- * Extensive experience in developing web pages using HTML, CSS, JavaScript, Vue.js, Laravel and PostgreSQL.
- * Good experience in React is for developing UI using React Functional Components, Hooks and React Router.
- * Good experience in build application in MERN (MongoDB, Express.js, React and Node.js) stack.

Work Experience

Beta as Software Engineer Oct 2017 to Till Date

Project: Collab Wells Role: Software Engineer

Technologies/Frameworks: PHP with Laravel, PostgresSQL, Vue.js, Tailwind

Tools: Whimsical, Figma, Sublime, Git Hub, Trello

Product Description: A SAAS product for Oil and Gas industry facilitating teams to collaborate with ease, while engineers in the industry are advised with relevant lessons and best practices in the real-time. Product also offers Well Lifecycle Reporting, Well Delivery Process, Schematics, Advise Engine and Risk Repositories. Contribution:

- * Understanding the client requirements and analysing them. * Making sure deployments and testing follow the Scrum (Agile) Methodology.
- * Writing the use cases, designing the UX, wireframes and if required prototyping using static site and fake data.
- * Developing the scalable application by following the code standards of vuejs and Laravel (PHP).
- * Optimizing backend performance by caching, eager loading and lazy loading using eloquent ORM.
- * Implemented Laravel's email, in-app notification and Pusher for the real time updates.
- * Worked on the DOM manipulation using JavaScript and Ajax.
- * Building reusable components and code using Mixins, Global Filters, Dynamic Component and Slots.

- * Optimizing applications using Vuex, lazy loading, dynamic importing and code splitting.
- * Building responsive web pages using tailwind defaults and CSS media queries.
- * Integrating third party libraries and packages. For example, TailwindCSS framework, Spatie Activity Log package,

Element UI theme and etc.

Project: MLR

Duration: Dec 2018 to Jun 2019 Role: Application Developer

Technologies/Frameworks: PHP with Laravel, React is, Tailwind

Tools: Whimsical, Sublime, Git Hub

Product Description:

A web application for an entity to manage the internal operations.

Contribution:

- * Understanding the client requirements and building mock-ups.
- * Building scalable and reusable functional controlled components.
- * Experience in using React Hooks (useState, useEffect), React Router (Switch, Route and Link) and building custom components using Callbacks.

Project: Obrota (In-house project) Duration: Jun 2018 to Dec 2018 Role: Application Developer

Technologies/Frameworks: PHP with Laravel, Laravel Spark, PostgresSQL, Vue.js, Tailwind

Tools: Whimsical, Figma, Sublime, Git Hub

Product Description:

A web application enables teams and individuals to track their work logs by integrating it to their Git Hub projects or manually creating the projects. Along with Task Management system it allows to create teams and manage their permissions to collaborate among the teams effectively.

Contribution:

- * Writing the use cases, designing the UX flows using Whimsical and wireframes using Figma.
- * Building the responsive web pages using CSS Media queries and Tailwind CSS.
- * Implementing Access Control using the Laravel Spark.
- * Implemented Laravel's email and Laravel Spark in-app notification.
- * Third party integrations like tiptap render less editor.

Project: Smashplex (In-house project) Duration: Oct 2017 to Jun 2018

Role: Content Manage **Product Description:**

Smashplex is a one stop digital platform to showcase the internet-based video content platform like web series, cover music, short films and stand-up comedy videos along with the artist profiles.

Contribution:

- * Understanding the user's mind and bringing new content into the system.
- * Resource management and curating the content.
- * Engaging with the artists and consumers collecting relevant data.
- * Image and Video editing.

Education

UG: B.Sc (Computers) from Osmania University in 2016
