# **Work Experience**

**Tech Mahindra** as Senior Software Engineer

May 2014 to Till Date

Duration Aug 2017 - Till date

Role Developer, Lead, Product Owner, Program Manager

Team Size 33

Tools & Technology ASP.NET, Oracle, SQL server 2014, exposure to Python

Client Name Tech Mahindra

Project Abstract:

This project is about to maintain, enhance and support IRIS Portal which are used at all users in Tech Mahindra. This is innovative Idea generation platform that tracks ideas journey from its inception to implementation stage. Through IRIS Tech can leverage the huge associate base to collate the ideas against the open business challenges. Worked to support this application and develop major features which required making it a stable and user friendly application

Also worked to make an application instance available for every customer request. Responsible for everything about the ideation platform, though which several ideation campaigns are published at organization level and few for customers. Also arranged few hackathons for associates which include online as well as in-person event

Key Result Areas:

Leading the entire gamut of software development activities which includes requirement gathering, coding, design,

testing, development and deployment / implementation

Supervising a team; assigning work to them, monitored their performance, and delivered outstanding results through coaching and direction

Acting as:

- o Product Owner of an ideation Portal; implementing enhancements to the portal, downtime approval, demo to internal as well as external audiences (customers and partners)
- Developer for implementing major as well as minor enhancement changes and change requests
- o Program Coordinator to manages the contest that are published and promote this contest and innovation work in the organization through admin mailers
- o Team member of Makers Lab which is innovation and R&D unit of Tech Mahindra under which tried my hands in learning and exploring new edge technologies

Managing marketing of platform and also promotion of the campaigns that are launched through the portal Monitoring project progress and outstanding issues; ensured the quality & timeliness of the deliverables; reported on the project's progress and escalated the issues

Interacting & communicating with BAs for requirement gathering; ensured adherence to the SLAs & change requests Developing & maintaining healthy business relations with clients and ensured high customer satisfaction matrices by achieving delivery & service quality norms

Managing configuration & custom development operations, using advanced queries to achieve reporting requirements, within performance constraints
