Summary

2 years of industry experience in the area of Software Development with good understanding of requirement analysis , design, development , implementation, debugging and maintenance .

Have good knowledge in OOP concepts and its implementation in development environment.

Proficient in web development process using Java and its framework (Spring Boot and Sturts).

Well acquainted with all phases of SDLC

Hands-on experience in writing SQL queries in PL/SQ-developer tool.

Good understanding of Data structures and algorithms.

Having good working knowledge on Angular Framework(Angular 5+) concepts like Dependency Injection, Routing, Directives,

Filters, Services and Two-Way Data binding.

Thoroughly worked on consuming REST API's.

Work Experience

Tata Consultancy Services Ltd. as Assistant System Engineer -Java

Mar 2018 to Till Date

Client: United India Insurance Company (UIIC)

Domain : Finance Role : Java Developer

Project Description:

Development of new UI and enhancement of old insurance portal along with their maintenance according to client requirement. Performance and UX optimization of the Mobile Application of the insurance portal. Optimization and modification of the insurance functionalities related to POLICY, CLAIM, CO-INSURANCE and other insurance domain according to the client requirement. Maintain the pl/sql jobs for offline policy generation and other related works.

TECHNICAL EXPERIENCE

Currently working on the Mobile App Development of the Insurance portal using Angular 5. HTML5,css and bootstrap are used in UX part and the server request is handled by REST API using jersey and Spring Boot Oracle is used as database.

Migrated the old portal from JAVA 4 to JAVA 8 with Struts framework and implemented some new validations/functionalities based HTML5, javascript and JQuery.

Designed and developed a Chatbot application using ALICE bot api in java and added this functionality to the main portal(https://uiic.co.in)

Apart from this concepts of OOP and Core Java have been followed in many development activities.

Also working on some functionalities which are being developed using angular js ,rest api (Spring BOOT) . The former will be implemented to the mainstream in the near future.

Co-ordinate with the team?s back-end developers on the process of consuming a RESTFUL API, Custom Directives and nested JSON iteration.

Hands on experience with tools such as Eclipse, MS VS Code, SOAP Api,.

Developed a web application ,The Question Bank, using HTML5,CSS,Angular JS and Jersey rest api with NOSQL database MongoDB. This application has been deployed in Heroku cloud server.
