Navsangeet Singh (1) Featured

Net Developer with 3 years of experience in microsoft tech seeking role in Application Development, Web Applications, Net Core, C#, Asp. Net MVC, Web

API, Docker, ORM, MicroServices, VS, LINQ, AZURE, Octopus, GIT, Microsoft Azure, SQL Server.

Current Designation: Programmer Analyst Total Experience: 3 Year(s) 1 Month(s)

Current Company: Cognizant Technology Solutions India Ltd Notice Period: 15 Days or less

Current Location: Pune Highest Degree:

Pref. Location: Bengaluru / Bangalore, Hyderabad, Pune Functional Area: IT Software - Application Programming /

Maintenance

Role: Software Developer

Industry: IT-Software/Software Services

Marital Status: Single/unmarried

Key Skills: .NET Framework, SQL Server, C#, ASP.Net, LINQ, Entity Framework, ASP.Net MVC, Microsoft Azure, GIT, TFS,.Net Core, Microservices, NUnit, C#. Net, Web API, Visual Studio, sql, azure, PAAS, Teamcity, Octopus, Devops,

Docker, Agile, IOC,.net

Verified: Phone Number | Email - id

Last Active: 20-Jan-21 Last Modified: 20-Jan-21

Summary

Motivated Technology professional with 3 years of experience around latest technologies, applications design and development in the growth oriented organization with focus on discipline and quality project and product delivery on time.

Work Experience

Cognizant Technology Solutions India Ltd as Programmer Analyst

Dec 2017 to Till Date

Description: In this project I created the multiple Web API's using .Net Core. The Web API's were mainly responsible for using the fetching and updating data in the data source through another 3rd party exposed API and classic database. I followed micro service based architecture. We used Azure DevOps for build and deployment pipeline.

Role: Software Engineer

Technologies Used: C#,.Net Core,SQL Server 2012,LINQ, GIT, Azure DevOps, Azure App Insights, Keyvault, Azure Alerts, Azure Service Bus.

Involved in requirement analysis, impact analysis, and design, identifying the changes and making the changes. Created functional specification & technical specification documents.

Created provisioning pipeline for azure resources using ARM template and Azure DevOps . Involved in functional and Integration testing of application .

Description: This endpoint was responsible for listening message on MSMQ which was published by azure bridge. The MSMQ queue was continuously monitored by endpoint where we implemented handlers which would get the message and dump the message details in database using dapper.

Role: Software Engineer

Technologies Used: C#,.Net,SQL Server 2012,LINQ,.NET Framework 4.5, GIT, TeamCity- Octopus(CICD), Azure App Insights, Azure Bridge, Keyvault.

Involved in requirement analysis, impact analysis, and design, identifying the changes and making the changes.

Created functional specification & technical specification documents. Created Teamcity-Octopus project from scratch. Involved in functional and unit testing of application.

Description: Service is responsible for validation of credit authorization, fulfillment of the manual refund and processing of the payment authorization results.

Role: Software Engineer

Technologies Used: C#.NET, SQL Server 2012, LINQ, .NET Framework 4.5, GIT, TeamCity, Octopus(CICD), Azure App Insights.

Involved in requirement analysis, impact analysis, and design, identifying the changes and making the changes.

Created functional specification & technical specification documents. Involved in functional and unit testing of application.

Description: Service mainly used to fill the 'order confirmation' email templates and to initiate order confirmation mails using communication service wherein translation service translates content if required.

Technologies Used: C#.NET, SQL Server 2012, LINQ, .NET Framework 4.5, GIT, Teamcity, Octopus(CICD), Azure App Insights.

Roles & Responsibilities:

Involved in requirement analysis, impact analysis, and design, identifying the changes and making the changes. Created functional specification & technical specification documents. Created Teamcity-Octopus Project from scratch. Involved in functional and unit testing of application.

Description: Service is responsible for reading events from cosmos db and dispatching them to azure service bus. Technologies Used: C#.NET,LINQ, .NET Framework 4.5, GIT, TeamCity, Octopus(CICD), Azure App Insights, Azure Service Bus .

Roles & Responsibilities:

Involved in requirement analysis, impact analysis, and design, identifying the changes and making the changes. Created functional specification & technical specification documents. Involved in functional and unit testing of application.

Education

UG: B.Tech/B.E. (Computers) from Punjab Technical University (PTU) in 2017
