Oct 2016 to Till Date

MEDFLOW Duration: October 2016 - Till Date

Technologies/Environment: C#.NET, VB.NET, WINFORMS, SQL SERVER-2012 .

Role: Software Engineer.

Team size: 8 Responsibilities

User interface design.

Coding for modules.

Contributed in Enhancement, Bug Fixing and L3 Support issues.

Project Description:

Medflow offers an EHR solution that is designed only for Eye Care. The system is built to accommodate all facets of a busy ophthalmic practice and to follow the patient through the clinic. Medflow integrates imaging, surgery, and patient education tools within the EHR system to create a full spectrum solution. The company is devoted to the idea that EHR is an evolving category and constantly updates the product to make sure users are in line with current standards.

1/22/2021

Tata Consultancy Services(On The payroll of Talent Capital India Pvt Ltd) as Software Engineer May 2016 to Oct 2016

Technologies/Environment: C#.NET.

Client : Microsoft

Role: Software Engineer

Team size: 20 Responsibilities:

Deployments to the latest build for the sitewide machines and working around issues during deployment.

Completing the test on new deliverables assign to us.

Logging bugs and resolving bugs assign to us.

Keeping of Automation run on our sites and updating results for triage.

Provisioning of Organizations on different environments for testing the test cases.

Working on MultiGeo operations by provisioning Organizations in different Region

Performing the Regression testing in every Sprint.

Project Description:

ACIS (Azure Customer Information Service) is centralized portal for all operations and controls to manage all CRM services in all regions. It is an Azure portal intended for Microsoft internal support users, developers, and DSE to access and make changes to production environments. ACIS integration is intended to replace crmlive.exe commands.

A single ACIS instance is used to manage many different Azure services among all regions.

ACIS has a web UI and command line tool.

Individual teams load their own pluginsextensions in ACIS.

A compliant way for developers to modify the service.

A robust infrastructure which is also used by other teams.

Discoverability of commands is good. Everything is a drop down, and sorted in groups.

ACIS has built-in auditing and logging and Automatic retries.
