Summary

I have over 3 years of work experience in developing JAVA based Applications using java with Spring MVC and Hibernate. Currently working with L & T Infotech as Software Engineer, which gives me an overall view of the business and enables me to be actively involved in various phases of the SDLC with SCRUM Agile methodology including requirement analysis, estimation, design, development, release management and post implementation support.

- * Experience in object-oriented analysis, development, testing, and integration of scalable, java based applications.
- * Strong knowledge in working with MVC architecture using Spring Framework & Hibernate.
- * Expertise in developing Object Oriented Applications using JAVA.
- Experience in using SQL and MySQL and DB2 database along with query writing.
- * Experience in using IBM /Tomcat Web server/Application server environment.
- * Participated in Unit Testing, Integration as well as Acceptance Testing.

Work Experience

L & T Infotech as Software Engineer

Jul 2017 to Till Date

Roles & Responsibilities

- * Requirement gathering, impact analysis.
- * Identify the heavy slow response application with the help of Dynatrace tool.
- * Analyze the most time-consuming webpages and hits with the Dynatrace tool.
- Analyze the java application and identify the refactoring code or repeated code in the RIS application.
- * Actively Involved in Scrum Meeting to discuss the Issue.
- * The suggested implementation to improve performance of application.
- Coordinating with teams for smooth delivery and Code review.
- Conducting KT sessions for the New Joinee to explain Dynatrace analysis .
