### Summary

- Achievement-oriented professional, offering a career of over 5 years in Application Development (Asp.Net, SSRS, .Netcore MVC and SQL Server)
- Skills in mapping business requirements, designing customized solutions with strong analytical skills and capability to analyze business practices and define optimal procedures
- Experience in the Software Development Lifecycle (SDLC) right from requirement analysis, documentation (functional specifications, technical design), coding & testing (preparation of test cases along with implementation) to maintenance of proposed applications
- Rich experience of working with customers, project managers and technical teams for securing & executing concurrent projects; envisioning usage of new technology and tailoring its usage for achieving desired results
- Proficiency in communicating with internal / external clients to determine specific requirements & expectations; managing client expectations as an indicator of quality

## Work Experience

#### Accenture Solutions Pvt. Ltd as Application Development Analyst Mar 2015 to Till Date

#### Role:

- Supervising the preparation of flowcharts, block diagrams and code programs for validation and testing
- Designing and writing unit tests; supporting developers in troubleshooting system issues along with monitoring system-level integration
- Providing overall leadership to the entire project team including managing deliverables of other functional team leaders
- Participating in the development and review of business & system requirements to obtain a thorough understanding of business needs in order to deliver accurate solutions
- Managing large and complex projects or multiple components of a large project involving more than one company's product
- Mapping clients' business requirements and translating these requirements into functional specifications, services, implementations, technical documentation and custom designing solutions Creating and managing the estimates, project plan, project schedule, resource allocation and expenses to ensure that
- targets were reached
- Working with relevant Resource Managers for project staffing and resource releases
- Following the project lifecycle methodology defined under the process framework; ensuring that customer deadlines

were met within project budgets

- Ensuring the maintenance of positive and on-going relationships with clients
- Understanding process requirements and providing use cases for the business, functional & technical requirements

#### Highlights:

- Added new functionalities to a .Net core Web api project
- Single-handedly by developed a new functionality in an Asp.net website for trapping a specific score from 3rd partly vendor service and according to that score an email event is generated and information is logged in internet.
- Formulated a MSRS report which fetches a certain data from database and user can view this report online
- Worked on developing a windows application which imports data from excel and compares it with the existing records from database and according to that user can insert, update, delete data in database via this application
- Delivered a Powershell script which can:
- Split a big file of any size into small files according to specific patterns or size mentioned
- Renames files with timestamp and achieves the file
- Delete files which are greater than a specific time period
- Developed stored procedure and enhanced existing stored procedures.
- Pivotal in production support and reviewed & tested Reports, fixed bugs (if any)
- Delivered a tool using C# which can run a query against database and save it into file .txt/.csv format with proper mapping of column fields and headers as per requirement given and copied them in required folder so other service can import them

#### **Education**

UG: B.Tech/B.E. (Electronics and communication) from Dr KN Modi Institute of Engineering and Technology, Modinagar in 2014
