Performance-driven professional with comprehensive understanding of Business Operations and strengths in efficient operations and client servicing; expertise in Implementing the Operations by Using Better Code Coverage.

Good understanding of object-oriented programming using C#, JavaScript and understanding of ASP.NET/Angular.

Work Experience

HCL Technology Limited as Software Engineer

Oct 2018 to Till Date

Project: iTime

Client: HCL Technology Limited

Team Size: 10

Solution Environment: Microsoft visual studio(ASP.net)

Front End: HTML, CSS, JavaScript, jQuery, Angularjs, Angular5, 7, 8, 9

Back End: C#, SQL server 2016

Description: iTime app is an application which is used to track the time spent on projects or tasks. Users can enter the start and end time of tasks. It can be a detailed breakdown of time spent on different tasks. This information is used for project costing, client billing, payroll, time tracking, and job estimation. Different methods of time tracking are used by employees at the workplace, like using a time tracking application, Punch cards. Time tracking software systems also provide employers with a trackable workflow for payroll approval. Inaccurate data entry is the leading cause of payroll errors. Time tracking software systems cut down these data entry errors to keep your payroll processing smoothly.

Key Responsibility Areas: UI design & Development

Reports Design Map with Data by Web API

Rannlab Technology Private Limited as Software Developer Jan 2017 to Sep 2018

Education

UG: BCA (Computers) from GLA University, Mathura, Uttar Pradesh in 2015
