Projects

Project Title: Online Jewellery Design Course Final Year PHP Project

Client: mca final year project Nature of Employment: Full Time

Duration: Jan 2019 - Jun 2019

Onsite / Offsite: Onsite

Project Details: The project ?online jewellery design course? is an application where the user can learn the course online and also learn it anywhere at any time at their own convenient period of time.

The application as two main role one is the admin and the other is user. The admin work is to provide updates to the application like adding course syllabus, adding documents, adding videos and also question papers too. And also keep the statistical records of the students. And at the end of the course the certificate is provided. The user(student) role is to see the details of the course which will be displayed in the course link. Then decide the course and register as per given requirements and login to the page and start learning the course by downloading the notes and get well prepared so that the course is completed soon and certificate can be achieved soon.
