Technologies C#.Net, SQL, MVC, XML, JSON, Web Service, Jobs.

Domain Finance

Client DLL(De LageLanden).

Tools Visual Studio 2012, SQL Server 2012, Windows Task Scheduler

Description:-

This product is India's first technological platform for Agri Finance. Product features are simulated in Android Tablet. Customers Service Providers take application loaded tablets and enroll customer for Agri Loan. Multiple systems involve in loan process (Himark, Cibil). Then Field Investigation will be done by CSP in tablet application by capturing and verifying data captured during Customer Origination., It contains many modules such as Deal Origination, Field Investigation, Collections etc.,

Responsibilities:-

- Developed Application logic using C#.
- Written stored Procedures in SQL server 2012.
- Created a Gateway Web Service which will Communicate to various other Services like Android Device and Highmark .Rapport etc..
- Created a Web Application for administrative privileges in MVC.
- 3. Project: EKYC Implementation in our banking Application

Technologies C#.Net, SQL, XML, Web Service.

Domain Banking Client Internal

Tools Visual Studio 2008, SQL Server 2008 R2.

Implementation of EKYC(Electronic-Know Your Customer) in our Own Banking application Product Called 'Ganaseva' in which the enrolments has to be happen through the biometric authentication using Aadhar which will be verified in NPCI,Once the authentication is success, the respective customer can do Enrolments, transactions etc., Responsibilities:-

- Developed application logic using C#.
- Written stored Procedures in SQL server 2008.
- Created a Client side Web service to communicate with NPCI Server.
- Created a simple UI for the EKYC Authentication.

Worked with INBUSSOL (from March 2016 to May 2018)

- Worked as a JavaScript Frontend Dev and SQL backend with experience in requirement analysis.
- Previously worked as an intern as a Graduate Teaching Assistant in DIT University, Dehradun from Aug 2014 to May 2015
- Worked in all stages of software development life cycle.
- Payroll Generation System 4. Project:

Technologies C# .Net, Java Script, SQL Server 2008

Domain Finance

Client Finance Officials at NIMHANS, Bangalore

Tools Visual Studio 2008, SQL 2008

Description:

The financial department of NIMHANS had decided to migrate the existing traditional method of generating payroll for its employees to a software system, so as to accomplish the same, it proposed the idea to the IT Department. The IT department of NIMHANS took up to automate the Payroll Generation System. It involves generating payroll for various categories of employees like Regular, Deputation, Project Engineers and Project Assistants etc. Also, Business and Domain constraints will vary for each category. We successfully implemented 7th pay commission in time. The project is divided into two phases includes first phase includes development of frontend software then and in second phase is for analysis on various aspects in data base.

5. Project: **Budget Analysis**

Technologies C# .Net, JavaScript, SQL server 2012

Domain

Client Finance & Commercial Officials at NIMHANS, Bangalore

Tools Visual Studio 2008, SQL Server 2012.

Description:

The project is about Budget Analysis from different aspects. So, in the organization there are many modules such as FSED, Open Tenders, out sourcing, Work Centre Fund allocation and many more. So, we are managing all information stored in DB and later generate reports and dashboard using ServiceNow.
