- ? Strong knowledge in project life-cycles (from requirements to project closure), software development life cycles (SDLC), software process methodology, and product deployment. Followed and implemented Agile-Scrum Methodologies.

Project Description: SICS is a set of standard products that are marketed and sold to reinsurance companies worldwide. As of 2019, the products will be used by over 100 reinsurance and insurance companies in Europe, the USA, Asia and Africa. Large companies usually buy SICS to replace internal computer systems, often systems that have been added to the organization through acquisitions and mergers. Gains come through reduced IT costs, improved and standardized processes, improved data quality, better reporting, access to new features, and the ability to oversee business internationally.

Responsibilities:

? Involved in developing business logic.

- ? Involved Database tables design, reporting ,written queries and logic operations.
- ? Involved in unit testing.

#### Project Description:

The main objective of this project is to load parcel invoices that are given by various customers and to rates those invoices based on the contracts that is done between customer and carrier. If carrier charging as per the contracts then we are closing this invoices automatically and sending those invoices to customers. If the invoices is charges more than we are capturing the amount that is more and we are sending these invoice details to carrier so that he can review those invoices and can reverse the amount to. Even this project s used by audit system to get the Freight rate based on the contracts between customer and carrier

#### Responsibilities:

- ? Participated in the design and development of the requirements.
- ? Database gueries creation and maintenance.
- ? Maintain and Develop unit cases.
- ? Involved in development of Swagger Documentation.
