Nov 2016 to Jul 2020

PROJECT DETAILS:

Electronic Document Management System (EDMS)

\* Client : RPG Life Sciences, RPG Life Sciences, RPG Life Sciences.

\* Designation : Software Engineer

\* Duration : 6 Months

\* Role : Database Developer and Administration

Time size

Description: AmpleLogic Electronic Pharmaceutical Document Management System (eDMS) or DMS Software is a computerized system that allows you to create, capture, organize, store, retrieve, manipulate and control the flow of documents in the electronic format. Designed with a unique tracking system, it aids in keeping the version controls on files that have been modified, re-modified and stored for future purposes.

This electronic data consists of emails, adverse event reports, complaints, batch records, quality control records and many other which are stored electronically. A document management system is designed to automate a business process which involves capturing of paper documents to ensure that an end user can retrieve the copy of paper document from their

We designed and developed an Electronic Document Management System (eDMS) as a solution for pharmaceuticals, life sciences, medical device, healthcare industries to curb documentation issues such as improper documentation, obtaining signatures and deliberately avoid conflicts and loss of data. Responsibilities:

- Involved in Database Programming.
- Created Database objects like Stored Procedures and Function, writing code for Data Triggers, Views on Tables using SQL Server Management Studio.
- Whenever required, make the changes in Existing Procedures and Subprograms.
- Involved in creating Tables & Views and Materialized Views and Indexes for increasing the performance.
- Attending project meetings, conveying weekly status to on-site team.
- Involved in performance tuning
