Summary

Competent techno-managerial professional, offering nearly 10 years of rich experience with impressive success in devising strategies, objectives, vision, roadmap & milestones for successful execution of programs

Successfully led projects through aggressive project governance processes; developed relationships with business stakeholders & leadership teams across geographies and departments

Excellence in building teams from ground level, mentoring and creating high performance culture; managing Stakeholders, Operations and Financial Management

Experienced Agile practitioner with implementations of methodologies such as scrum and Extreme Programming (XP) to achieve maximum productivity from teams

Work Experience

- **MAQ Software** as Technical Project Manager
  Apr 2018 to Till Date

  Project 1: Took Over an end-to-end DataOps Team and Improved Client Relationship through Improved Execution
      Slashed end-to-end job run from 19 hours to less than 6 by implementing parallel job flows and code standardization
      Invited external reviewers to suggest best practices and worked with client in spike sprint creation to reduce page load times
      Introduced Infrastructure audits which helped reduced overall cost of infra to client by $200 per month
      Initiated a rotation mechanism by which associates would alternate between Dev & support activities; expanded their horizons

  Project 2: Upgrading the Entire Vendor Management System from an IaaS to PaaS System
      Developed pitch for cloud migration by working with SME's & coordinated with account manager to convince client
      Designed the phase wise deliverables along with bandwidth required for 5 teams along with communication mechanisms
      Steered meetings to standardize the architecture across 5 teams and coordinated development of commonly used tools
      Revised plans/reallocated bandwidth as and when necessary; kept the client informed to ensure transparency
      Monitored delivery across 3 teams (reporting to other managers) to ensure overall project deadlines were met

  Project 3: Optimization and Enhancement of ETL Ecosystem used for Aggregating and Visualizing Sales & Consumption Data
      Coordinated with on-site business analyst to plan timelines and deliverables based on team bandwidth and scope complexity
      Created and tracked Userstories to closure for the requirements gathered by Onsite Business Analyst

Drove initiative that optimized job flows, bringing down end to end job run from 52 hours to 23 hours
Planned & executed Fiscal year transition with 25% reduced bandwidth by automating processes in advance

Significant Achievements:
Created the primary vision of SaaS migration project for 7 teams including acceptance criteria and the sprint allocations
Introduced a center of excellence for Microsoft Power Platform that worked with 70+ associates across 3 locations
o   Created 5 new Apps, 8 case studies and 4 consulting offerings in Microsoft App source for MAQ Software
o   Created Sales pitches for Power Platform based solutions and developed 8 internal tools to showcase to potential client
Pioneered the MS Power Platform upskilling initiative for 70+ associates; with a track record of 30+ associates clearing PL-900

Infosys Limited as Technology Analyst
Mar 2015 to Apr 2017

Directed team of technical consultants in maintaining the $2 million leasing product of a Networking Hardware manufacturing client

Significant Achievements:
Planned & delivered features critical to leasing product and implemented changes to boost its overall performance
o   Streamlined the archival process and improved processing time by around 20% by reducing flow related redundancies
o   Augmented system responsiveness by about 35% by co-architecting a new system to which existing data was migrated
Delivered a system critical feature (document upload) by orchestrating a practice run with multiple stakeholders
o   Analyzed 6 user stories, designed technical flow and created effort - timeline estimates for the implementation
o   Supervised 4 developers in implementation; interfaced with the multiple stakeholder teams to ensure client satisfaction
Augmented runtime of the monthly reports by 45% by eliminating redundancies and introducing code reusability

Tata Consultancy Services Limited as Systems Engineer
Nov 2010 to Feb 2015

Consulted on Oracle applications technical implementations, advised telecom giants on solutions to their business requirements

Significant Achievements
Directed engineered CRM related code changes for an ?8 Lakh market segment across all service requests, earning appreciation
Managed offshore CRM track as single point of contact (SPOC) for a Kuwait based Telecom client for 2 quarters
Conducted a BA COE (Business Analysis Center of Excellence) week, worked in concert with SPOCs from 3 locations
Delivered training to a batch of 65 newly recruited associates in Oracle applications at the Initial Learning Program (TCS)
o   Designed the syllabus, took classes and set the evaluation quiz for the batch, earning the award of "Champion of ILP"
