Work Experience

Blackmelon Advance Technology Pvt. Ltd. (247Around) as Software Developer
Apr 2016 to Till Date

Project Title - CRM System
Company - 247Around
Technologies: Html, Css, Jquery, Ajax, PHP, Codeigniter, Mysql, Angular js
Role: Lead Developer
Project Profile: 247 around serves as an appliance buddy for all home appliance post-purchase needs i.e. from installation to disposal. One can book a service either through Android App, website or call center
Responsibilities :

Built a CRM system with 4 different modules for Admin, Service Center, Warehouse and Partners .
Maintain and add new features in CRM & Website .
Worked on Module:
Built an api to help partners register their leads on the CRM system, this helped in automation of the
lead generation process and saved a lot of time for the partners.
Developed a module to read email and pass information from attached documents to the CRM system
and develop a tentative booking.
Integrated Exotel api in the CRM system which helps call center executives to connect directly with
the customer.
Used Msg91?s api to regularly update customers and vendors on the progress via SMS.
Automated the process of service support at customer?s location. Along with that the system
automatically calculates the fair, estimated time to reach and shows directions via map to the support
engineer.
Developed a payment tracker for prepaid/postpaid services provided to the partner.
Developed an inventory system to manage stock of spare parts and their usage history. It also
maintains a used part journey from customer to company?s warehouse.
Integrated Tracking Mode api to track courier location of the spare parts to ensure on time delivery.
Developed an Invoice module which helps in automatically generating and sending invoices to the
partner and service centre. Along with that this module tracks pending, upcoming payments and
received payments.
Working as Team Leader
Participate in all phases of development starting with a conceptual model through functional and
detailed design to implementation, debugging and deployment of the software solution.
Direct and participate with team members in the analysis, development and delivery of all support and
project work for assigned application(s).
Perform resource planning, deployment, tracking and reporting for all assigned team members.
Consult with clients and team members to develop technical solutions to complex
business/information problems.
Provides status updates and communicates frequently with/to end-users as well as with local, regional
and global support and management teams.
Guide and support internal team for smooth delivery and maintenance during daily work

Project Title - Buyback System
Company - 247Around
Technologies: ReactJs, NodeJs, Mysql
Role: Software Developer
Project Profile: Buyback is a product exchange program where we manage the exchange product against new product
purchased on ecommerce platforms across the country. It involves interplay of three stakeholders: ecommerce partner,
city wise collection partner & 247around.
Responsibilities :
Handled Backed of the system .
Maintain and add new features in the system.
Worked on Module:
We integrated the system with Gmail. Whenever the data we received from a partner for buyback then
it will automatically fetch and upload the system.
When data is uploaded to the system, there is no manual process to assign a Collection Partner for the
further process. Means it automatically assigns to our Collection Partner.
After the completion of the process, Collection Partner marks the remarks in the system then we
provide the invoice to Collection Partner in the Month End.

Numetric Technologies Pvt. Ltd. as Software Developer
Sep 2014 to Apr 2016

Project Title - 247Around
Company: Around (Startup)
Technologies: Android, Html, css, Jquery, ajax, php, codeigniter, mysql
