Software Engineer seeking roles in Software Development,Software Maintenance,Performance Tuning,Requirement Gathering,Defect Resolution,Coding,Joint Application Development,Requirement Analysis,Configuration Management,RPA Development,VB6

Current Designation: **Software Engineer**

Current Company: **Girahsys Software Services INC**

Current Location: **Bengaluru / Bangalore**

Pref. Location: **Bengaluru / Bangalore,Chennai,Hyderabad**

Functional Area: **IT Software - Application Programming / Maintenance**

Role: **Software Developer**

Industry: **IT-Software/Software Services**

Marital Status: **Single/unmarried**

Key Skills: Software Engineer,Software Developer,Software Development,Software Maintenance,Performance Tuning,Requirement Gathering,Defect Resolution,Coding,Joint Application Development,Requirement Analysis,Configuration Management,RPA Development,VB6

Verified :   **Phone Number |**   **Email - id**

Total Experience: **6 Year(s) 0 Month(s)**

Highest Degree: **B.Tech/B.E. [Computers]**

Last Active: 21-Jan-21   Last Modified: 21-Jan-21

Summary

*   B.E. (Computer Science Engineering) professional with over 6 years of experience in Software Development; executed two projects of Excel to PowerPoint Development for the entire project
*   Completed training course in RPA Development from Intellipaat, Bengaluru
*   Strong exposure in mapping clients' business requirements and translating these requirements into functional specifications and customized designing solutions
*   Possess rich exposure of Software Development Lifecycle (SDLC) right from requirement gathering & analysis, documentation (functional specifications, technical design) and coding
*   Updated knowledge by studying state-of-the-art development tools, programming techniques, and computing equipment
*   Resourceful in analysing & interpreting unique problem, and applying logical & analytical thinking to find the right solution

Work Experience

Girahsys Software Services INC as Software Engineer
Sep 2014 to Till Date

*   Developing software solutions by analyzing information needs, conferring with users, studying systems flow, data usage, and work processes; gathering requirements from the clients through telephonic conference call
*   Analysing & planning the requirements for the required project; preparing functional specifications and high-level design documents
*   Performing coding & development; updating and managing the project related issues
*   Working closely with Quality Assurance Team to help them develop and execute automated test scripts, using the provided automation framework
*   Supporting clients in a cross-functional environment; performing analysis based on requirements gathering and technical evaluation
*   Managing the maintenance of program modules including operational support, problem resolution, production support, preventative and corrective maintenance and enhancements
*   Assisting in determining operational feasibility through analysis, problem definition, requirement analysis, and proposing solutions
*   Documenting software solutions through flowcharts, layouts, diagrams, charts, code comments and clear code
*   Formulating solutions for given technical specifications; installing application software and deploying customizations; contributing to the code reviews
*   Testing modules developed by self & the team to ensure that these are as per desired quality standards; writing test

specifications and conducting tests
*   Operating with the Product Management Team and engaging with the internal customers to understand requirements and gather feedback on solutions
*   Executing unit/ basic/ functional test cases and framework
*   Contributing to software improvements (products, processes, methods, tools), design inspection and code review
*   Liaising with the stakeholders during problem diagnoses, requirements gathering, detailed level design, development, system test and production implementation to ensure that optimal resolutions are achieved
*   Reviewing detailed design, code & test cases; resolving various defects, errors and issues encountered
*   Following the project life cycle methodology defined under the process framework
*   Driving efforts towards maintaining software development practices; adhering to company standards for coding and unit/ functional test coverage
*   Reporting overall status of the project to the client and the senior management

Education

UG: **B.Tech/B.E. (Computers)** from **Government College of Engineering, Chamarajnagar** in **2013**

Other Qualifications/Certifications/Programs:
Training Course in RPA Development
