Summary

A result-oriented professional with over 2 years of experience in Software Development, Project Management, Application Programming, Requirement Gathering, Client Management, Python, Django, Flask, R, MySQL, Linux

Work Experience

Accusaga as Python Developer
Sep 2019 to Till Date

PROJECT:
Title: IngenSpark
Role: Python Developer
Environment: Flask, Github, Docker
Description:
Developed an IngenSpark web application for the collection of intelligent bots constantly processing, transforming, analyzing huge volumes of structured/unstructured data increasing decision speed and effectiveness by automating several marketing and sales analytics processes like dashboarding, customer segmentation, trends break analytics, impact measurement, performance driver analysis, investment optimization, etc.

Worked as Software Developer for Norm Software from December 2018 to August 2019.

PROJECT:
Title: Double Critical
Role: Python Developer
Environment: Python, Django, Github
Description:
Double Critical is a mobile application project that is working on both iOS and Android.
It's a gaming application. Registered users can upload any game descriptions about the game(photos, videos) for that game. We can write feeds about games, users can save that game like game collections(favorite game), users can follow each other, and also users can write reviews about the games.
Project 2:
Client: Jvb health wellness.
Role: Backend developer.

Environment: Python, Django, Heroku, GitHub

Description: Helping people to improve their Health and Quality of life through a targeted approach to personnel transformation. JVB offers services like a marathon, Triathlon, general health & wellness coaching, data review & analysis, and certification programmers. Data reviews and analysis of your workouts, nutrition, sleep, movement, and race results. We will get the data from Health watches like Fitbit, Garmin, Apple and etc. We integrated all those watches on the web and as well in mobile applications. We designed the dashboard where end-users can view their report summary in the leaderboard and also available for download in the excel format.

Norm Software as Software Developer
Sep 2018 to Aug 2019

*   Involved in Requirement Analysis, Client communication, Design, Coding and Deployments.
*   Using Python and Django   to develop the backend of the web application, along with Django REST Framework (API).
*   Developing a web application for small business owners to be hosted on HEROKU.
*   Solid experience working with the Django framework and developing the methods for Create, Read, Update and Delete (CRUD) in Active Record.
*   Used a test runner to validate the code while developing the web application.
*   Used Github and Gitlab to push and pull code from the master branch, created local branches to work on the code on my system before committing back to the master branch.
*   Experienced in LAMP (Linux, MySQL and Python) Architecture with SQLite, PostgreSQL in Django.
*   Willingness to work in a highly dynamic environment and ready to take up challenges. Able to work under Time Crunch Schedules & capable to effectively handle multiple Ongoing Projects.
*   Excellent communication and interpersonal skills, ability to work independently as well as part of an integrated team.
