Work Experience

Delaplex Private Limited, as Software Specialist
Nov 2018 to Till Date

Project Executed
Project 1: E-commerce Website
Technologies: Python3.6, Django2.0, HTML, CSS and Integrated multiple 3rd Party API like Msg91 & SendGrid
Key Result Areas:
Participated in the entire phase of development cycle of a user-friendly e-commerce website
Improved the user-clicks by 50% and subsequent increase in sales by 30%
Project 2: Inter-departmental Ticketing System
Technologies: Python and Django
Key Result Areas:
Enabled the users to escalate or provide feedback if the issues is not resolved within defined SLA and increased the productivity by 40%
Project 3: ATMLifeCycleManagement
Key Result Areas:
Managed the bank ATM's, its accessories, inbound/outbound shipments, sales and purchase across multiple warehouses by developing an ERP application in Odoo for the client

Reduced the manual workforce to maintain the inventory data in MS-Access and expedite the entire process which resulted in increase of the productivity by 50%

Green Leaves Consumer Services as Software Developer
Aug 2016 to Oct 2018

Project Executed:
Project: Repeat-customer Metric Tracking and Improvement Tool

Key Result Areas:
Formed a system to track the customer's journey through a program
Created multiple modules to show the details of orders done, gifts sent, eligibility time to next order as well as auto-notifications via SMS to remind customers of their next gift if they order a service
Achieved an increase in the repeat order rate of customers, leading to a 25% increase in revenue
Project 1: Support Center Daily Productivity Dashboard
Period: Please Mention
Key Result Areas:
Improved the productivity of the support team by tracking the performance of each executive and induce a sense of healthy competition using incentives
Produced API's to auto-refresh the dashboard every 2 mins to track and display the real-time performance metrics in terms of both volume and revenue for each calling executive
