Work Experience

Qualcomm as Salesforce Developer
Nov 2018 to Till Date

Client: Talent Rover
Duration: Nov'18 to date
Role: Salesforce Developer
Environment: Salesforce.com, Apex, Visualforce, Triggers, Data Loader
Project Description: Talent Rover is a product based company. It's a Sales & requirement product in AppExchange. My responsibility includes the various enhancements in the product along with design & solution for new clients. Maintaining product quality, configuration & customizing the product as per the client requirement.
Key Result Areas:
Created Apex classes & Apex triggers based on business requirements
Contributed in implementation of Build to the new UI using customization VF page, Lightning Component & Java Script
Executed detailed analysis of Business & Technical requirements and designed the solution by customizing various standard objects of Salesforce.com (SFDC) and stylizing other platform-based technologies like Visual Force, Force.com API
Designed & deployed custom objects validation rules, page layouts, custom tabs, components, Visual force

pages to suit the needs of the application
Used SOQL for data manipulation needs of the application using platform-based objects
Developed multiple record types based on the category of clients
Used data loader to make the bulk upload of client data

Persistent Systems as Salesforce Developer
Apr 2018 to Oct 2018

Client: Motorola Solutions Inc.
Duration: Six Months
Role: Salesforce Associate Developer & Admin
Environment: Salesforce.com, Apex, Visualforce, Data Loader
Project Description: Electronics Communication Major "Motorola" is a leading designer & manufacturer of
Cellphones & cordless phones, two-way radios, pagers, cable modems, broadband setup boxes. The Project was
based on migrating all the data from one instance to another instance. The goal of migration was to analyze and
access the level of effort required to migrate users and data into a salesforce.com platform.
Key Result Areas:
Developed Apex triggers, classes, Visual Force pages
Imported accounts and contacts through import Wizard
Created & Customized the Dashboards & Reports with Salesforce CRM
Formed workflows & approval processes and developed validation rules
Performed data migration into salesforce application using Apex data loader through CSV files.
Worked in querying salesforce tables utilizing SOQL & SQSL queries using Force.com Explorer
Performed detailed analysis of Business & Technical requirements and designed the solution by custom various
standard objects of dalesforce.com (SFDC)
Applied security & sharing rules at object, field & record level for different users at different levels of the
organization, also created various profiles and configured the permissions based on the hierarchy
