Summary

*   6 years of experience in Software Development, which mostly concentrates on ORACLE PL/SQL coding, Data Analysis and ORACLE Performance tuning activities. Having an excellent learning ability, good communication skills and capable to work at various proficient levels as key team player.
*   Have worked in Oracle 11g ,12C and EXADATA environment.
*   Good in programming concepts of Oracle PL/SQL.
*   Efficient in SQL queries and used tools like SQL Developer, PL/SQL Developer, SQL *PLUS and Toad for Oracle to implement it.
*   Experience in PL/SQL code development, Oracle database performance tuning activities.
Looking forward to work in an environment where I can utilize my expertise and knowledge in technical skills, towards the development and implementation of the new ideas and continuous learning, contributing to growth of the organization.

Work Experience

LTI as Senior Software Engineer
Sep 2016 to Till Date

Project   : KYC Data Investigation
Role   : PL/SQL developer and data analysis
Platform   : Oracle 11g and 12C
Duration   : September 2016 ? Till date
Description   :
The scope of the project aims at ensuring data quality to banking firm, where production data have discrepancies.
Providing data analysis, data patches based on analysis or providing data to other teams for code/configuration changes.

 Responsibilities:
1.Data analysis, identifying data issue and functionality gap and providing fixes for the same.
2.Creating data patches, testing and review to fix data issues.
3.Preparation test files and validation of data based on functionality/business requirement.
4.Interact with various upstream and downstream systems to understand gaps in data and enhance the quality of data flowing.
5.Supporting various releases, testing data flow and deployments in Production.

6.Tuning long running SQLs and scripts.
7.Involved in adhoc activities related to data quality.

Hexaware Technologies as Software Engineer
Jul 2014 to Aug 2016

*   Project   : Oracle Performance Tuning
Role   : SQL and Application Tuning
Platform   : Oracle 11g
Duration   : July 2014 - August 2016
Description   :
The project was mainly aimed at providing performance tuning support to the banking firm, where the production database undergoes a lot of load throughout the day. Provide optimizing techniques to long running SQLs at production database.

Responsibilities:
*   Implementation of optimizing techniques to long running SQLs by re-writing the query, indexing, partitioning , sequence recycling , sequence ordering and applying hints.
*   Creating procedures, functions and packages with test cases.
*   Analyzing AWR reports for wait events.
*   Creating impact analysis documents to analyze the effect of changes.
*   Gathering statistics and calculating the overall improvement.
*   Communication with onsite coordinator and customer.

Education

UG: **B.Tech/B.E. (Electronics/Telecommunication)** from **Gandhi Institute For Engineering And technology** in **2014**
