Work Experience

Wipro as Project Engineer -Java
Jul 2018 to Till Date

PROJECTS:
Projects Title: MaxSafe Health Android Application.

From :-Nov 2019 Till present.

Environment: Eclipse, Java/J2EE, MySQL, AWS Management Console, RDS, EC2.

Project Details: This project was to provide backend support to MAxSafe Health Android Application for staff, non-staff. This involves to develop APIs on cloud using AWS Management Console services like API Gateway, Lambda Functions, VPC, S3, Bucket, RDS etc. App involves features like to update basic login details, changing profile pictures, upload site details(location through GPS, uploading site photos/videos), check-in/check-out time etc.

My Responsibilities:
Involved in the Requirement Analysis and Understanding.
Involved in attending scrums calls and quick Issue resolution.
Required Regular Client Interaction over Conference calls.
To check if the functionality of APIs is valid.
Need to Simulate the Issues if any and check for various resolution.
If the scenario is valid then providing a fix to the issue.
Involved in Test Strategy, Test Plan creation and Test Execution Estimation.

Involved in providing proper documentation for Handovers to front-end team.
Assigning tasks to peer and assisting team.
To maintain good and healthy relationship with the client was also a Priority.

Projects Title: Automatic Payment and Reversal Application.

II. From　　　　 : - March 2019 to Sep 2019

Technologies　　 : - Java, Python scripting, Spring ,Hibernate and Oracle SQL.

Project Details: This project was to process bank statement of multiple providers and then initiate their payment or reversal as per the requirement. Application involves processing of bank statement of many users and after cleaning the data storing it in database, consumed Rest Api to get the location of users (Kenan ,Amdocs),then consumed many other Api to fetch more details related to the user and then do reversal or payment, generated several reports

My Responsibilities:
Involved in business logic and code development.
Defect fixing and support.
Deployment on unix server.
Following agile methodology.
Involved in providing proper documentation for Handovers.
Performed Unit Testing of modules.
Maintaining good and healthy relationship with the client.
Providing technical assistance to the team members.

Projects Title: Hotlink Gaming Portal.

From　　　　 : - Jan 2018 to Sep 2018

Technologies　　 : -Spring, Java, Jboss and Oracle SQL.

Project Details: This project was to manage all the users who are registered for online games in Hotlink Gaming portal. Application involves user login, new user signup, top-up using vouchers, purchasing games and generation of multiple reports on daily and monthly basis for analysis.

My Responsibilities:
Involved in business logic and code development.
Defect fixing and support
Following agile methodology.
Deployment in Tomcat server.
Maintaining good and healthy relationship with the client.
Providing technical assistance to the team members.

Projects Title: Conser Application.

From　　　　 : - July 2018 to Dec 2018

Technologies :- Java, Json, Rest Api, Jboss, Sql Server, Python scripting, cronjob

Project Details: This project is for package delivery system in Fedex .Conser is an application which is to keep track of all the packages delivered by Fedex. Application involves generation of different types of reports on the packages from different countries, region, area, type and based on the reports analysis is done. The data of packages are fetched from multiple resources like database, consuming Rest Api.

My Responsibilities:
Involved in business logic and code development.
Delivering design document, unit test document.
Developing as well as deployment of complete application.
Following agile methodology.
Deployment in Jboss.
