audit, the hallmarks of our
corporate sector.
* Administration of Subversion tool includes creating branches, tagging,
access permissions and setting up hooks & locks.
* Have been In-charge for a shift and gave the support in production
environment.
* Have Maintained all the servers are without any down time in the
production environments.
* Monitored all the resources by using SignalFx, Grafana.
* Used to create alerts to maintain the stable infra structure.
* Written Terraform code for booting up of instances in GCP.
* Implemented CI/CD in Jenkins pipeline jobs and automated with
ansible
* Used maven as a build tool for creation of packages.
* Implemented Agile principles in our project.
* Implemented Continuous Integration, Nightly, Branch Builds
according to application releases using JENKINS.
* Configured Kubernetes cluster at POC for migration from Mesos to
Kubernetes.
* Written playbooks and Python scripts to customize the Ansible as per
our environment.
* Integrated Maven with GIT to manage and deploy project related
tags.
* Hands on experience in Amazon Web Services (AWS) provisioning
and good knowledge of AWS services like EC2, Elastic Load-balancers,
Project Name Cisco Systems Inc. USA (Global
support and Quality services)
Role Devops Engineer
Team Size 4
Duration
Environment Windows 7&8,Linux/unix,SQL Server,
MySQL, GIT, Jenkins, Maven, AWS,
Docker.
Description B2B-CSCC: -CISCO Service
Contract Centre (CSCC) is a web
application used to create
estimations, quotes and contracts
for the customers on the various
products and services provided by
CISCO. This application follows 1-
tier architecture of CISCO wherein,
between the End Customer and
CISCO, there is a Partner. Post the
contract creation, this application
also provides management of
those contracts through the Online
Contract Management tool.
Involved in automation script
develop for this module especially
to creation of xml's based upon
* Software Configuration management (Build and continuous
Integration using Maven, Jenkins &GIT.)
* Written manifests to customize the Ansible as per our environment.
* Manage the configurations of multiple servers using Ansible.
* Integrated the Ansible playbooks with Jenkins.
* Having good exposure in Jenkins for CI (Continuous Integration).
* Administered version control system that included branching and
merging.
* Responsible for creating and developing the build process
environment.
* Configured Kubernetes cluster and implemented in the staging
environment.
* Hands on experience in Amazon Web Services (AWS) provisioning
and good knowledge of AWS services like EC2, Elastic Load-balancers,
S3, RDS, DMS, VPC, Route53, IAM, Elastic Search.
* Launching Amazon EC2 Cloud Instances using Amazon Web Services
(Linux/ Ubuntu) and Configuring launched instances with respect to

specific applications.
* Defined AWS Security Groups which acted as virtual firewalls that controlled the traffic allowed reaching one or more
AWS EC2 instances.
* Hands-on in writing the Docker files for building images.
* Containerizing applications with Docker
* Responsible for managing the Docker private registry.
* Participate in building the DevOps Platform with DevOps tools and
high-end scripting languages like Chef.
* Developing build and deployment pipelines using Jenkins, Maven,
ANT for Java applications
*
