Work Experience

Tata Technologies Limited as Software Engineer -Dot Net
Apr 2015 to Till Date

PROJECT EXPOSURE

Project Title: ERC-Time booking System
Technology: ASP.Net, Oracle 12c
Description: Currently working as Lead Developer/Tester/Support Person/SPOC in handling this system.
    ERC Timebooking system is application where employees of ERC division of TATA MOTORS do their time booking on various projects.
    Their manager approves this booking and then records gets transferred to SAP.
Role: SPOC for the system. I have added many new functionalities/ Modules/Reports in this system. Worked on front-end as well as back-end.

Project Title: Raw Material Content Management System
Technology: .Net MVC, Oracle 12c
Description: This system deals with Raw Material Management for TATA MOTORS purchase department. It has Modules like Price Amendment / Master-data Maintenance / Approval

Role: Working as Application support person for Data Management.

Project Title: Enterprise Metrology System
Technology: ASP.Net, SQL server 2014
Description: TATA MOTORS for tracking measurements / calibration of machine tools use this application. Application contains details of tools, details and history of calibration done in tools and various reports.
Role: Designing new screens and functionalities in application. Modification in reports. Worked in development and support activities.

Project Title: Web Applications Support
Technology: BMC-Remedy IT service management tool /Aditaas IT support tool
Description: Remedy is IT support service tool where user raises tickets for the issues/requests and those can be tracked and resolved through this system.
Role: Worked as a part of support team. Resolved numerous issues of web applications raised by users.

Project Title: Flashing and Diagnostic application for TATA XENON and TATA SAFARI car.
Technology: VB.net, SQL server 2014
Description: This tool is standalone application that is used for vehicle diagnostic of TATA XENON and TATA SAFARI. This application reads various parameters from ECU (Electronic Control Unit) of vehicle and stores the records in database.
Role: Application development, testing, and support. Worked as a lead developer.

Project Title: Speed Limiter Device for TATA commercial vehicles
Technology: VB.net, SQL server 2014
Description: This application is used for writing speed-limiting parameters in ECU of Tata Commercial vehicles (TATA TRUCKS). This will set maximum speed limit for vehicle. These parameters are fetched from database and gets written in ECU of vehicle . .
Role: Application development and deployment in production environment. Worked as a lead developer.
