An enthusiastic & high energy-driven Splunk Trained & Certified Power User Developer, Certified Admin & Certified ITSI and Splunk Trained Architect targeting assignments in Splunk Development, Admin & Operations with an organization of repute in IT Industry, preferably in Bangalore & Hyderabad.
Got the exposure in Agile, AWS, Docker, GitHub, Jenkins, Swagger, Chef
Development Kit, API, WSO2, OpenShift and ELK. Sybase database, Sun Solaris Server, Citrix NetScaler, Zabbix, PL/SQL Developer database & Unix.

Work Experience

Cognizant Technologies Solutions as Sr. Infra Developer -IT
Jan 2019 to Till Date

Key Result Areas:

　　Managing Splunk IT Service Intelligence issues (Creating & Troubleshooting of KPI?s, Services, Thresholding, and so on) and ITSI Components; upgrading the Splunk instances, adding new instances to cluster environment, creating data retention policies and performing index administration, maintenance and optimization
　　Creating & troubleshooting Reports, Dashboards & Alerts for different applications/data/accounts, to show relevant app resources being accessed more and so on and proposing new use cases to create reports on security.
　　Developing and maintaining expertise on the implementation of security technologies and their application to defensive activities with a focus on security information and event management (SIEM)
　　Configuring and administering Splunk Enterprise Server and Splunk Forwarder on Red Hat Linux Servers; setting up Splunk Forwarders for new application tiers introduced into environment and existing applications
　　Delivering and maintaining a suite of defensive security technologies across Symantec, implementing patterns derived from the Security Architecture team and meeting the requirements of the Security Operations Center
　　Developing clustered and non-clustered indexes for increasing the performance and monitoring indexes by troubleshooting any corrupt indexes
　　Monitoring the Applications (Servers, Logs and so on) and ensuring they run smooth all the time
　　Standardizing and implementing Splunk Universal Forwarder deployment; configuring and maintaining Linux platforms
　　Designing presentation layers for Technical, Business and Executive Management showing environment operational health based on Key Performance Indicators
　　Changing the configuration in indexes and SH cluster environment, License key reset; installing / configuring new apps/

configuration changes done in deployer and push the changes to search head cluster

    Experience with Splunk Searching and Reporting modules, Knowledge Objects, Administration, Clustering and Forwarder Management; managing Splunk configuration files like inputs, props, outputs, transforms, indexes, app, limits, servers and so on

    Creating Filed extractions & Field Transformations, Peer health and Dispatch count checking, Managing Splunk user accounts and Monitoring Splunk License, CPU, Disc usage, etc.,

    Creating API on WSO2 using Swagger, develop microservices using Swagger; CI / CD Integration, Open Shift deployment & Configure WSO2 with back end microservices and creation of dashboards and reports for different applications / microservices & log analysis using AWS, Splunk & ELK.

    Creating & troubleshooting of dashboards and reports using Sumologic for different applications, etc., and Creating SOP?s for different issues for future reference.

Highlights:

    Ensured support tickets were fully updated with the most current data and provided proper escalations and handoffs to management

    Specialized in validating applications for Code / Infra / Unix patching releases, managing outages / impairments smoothly without impacting the application / end users and finding Problem management tasks

    Requested Global Change Approvals and implemented as per the request by the client; got appreciation for the same

Accenture as Application Development Analyst
