Software Developer seeking roles in Software Development,Application
Programming,Machine Learning,Requirement Gathering,Agile Methodology,Defect
Management,Technical Architecture,Quality Assurance,Client
Management,Tomcat,Jenkins,Selenium,TestNG,Java

Current Designation: **Software Developer**	Total Experience: **2 Year(s) 5 Month(s)**
Current Company: **Dell Technologies**	Notice Period: **2 Months**
Current Location: **Bengaluru / Bangalore**	Highest Degree: **B.Tech/B.E. [Computers]**

Pref. Location: **Kolkata,Pune,Bengaluru / Bangalore**

Functional Area: **IT Software - Application Programming /
Maintenance**

Role: **Software Developer**

Industry: **IT-Software/Software Services**

Marital Status: **Single/unmarried**

Key Skills: Agile Methodology,Defect Management,Technical Architecture,Client
Management,Tomcat,Jenkins,Selenium,TestNG,Java,Spring,Spring Boot,Bootstrap,Microservices,Spring
Security,CSS,Html5,JUnit,JPA,Maven,Software Developer

Verified :   **Phone Number |**   **Email - id**

Last Active: **18-Jan-21**   Last Modified: **18-Jan-21**

Summary

An enthusiastic technocrat offering an experience of 2.5 years in Java Development, API Development, Spring Boot & scripting
in Python Gained understanding of various software development concepts such as Java Programming, MySQL, Python
Programming, Data Structures, Java, Python, HTML, CSS, Spring Boot, API, JUNIT & Swagger Drove efforts towards
maintaining software development practices; adhering to company standards for coding and Automation test coverage Skills in
developing, implementing, and maintaining Java-based components and interfaces and knowledge of web-based development
by utilizing Python, Shell & Bash Proficient in developing automation scripts using selenium-java to automate functionalities
along with skills in using CI/CD(Jenkins) Technical knowledge base includes Tensorflow (Machine Learning), Tomcat, Bitbucket
& OOPS Concept

Work Experience

Dell Technologies as Software Developer
Feb 2018 to Till Date

Key Result Areas:
Creating & maintaining the Dell Management Suit 2.0 and resolving the issues post bug fixing Coordinating with cross-
functional teams like the testing team to understand the severity of the issue; troubleshooting and resolving the issues in a
timely manner Working on and contributing in the development of DMS 3.0 Contributing to end-to-end design,
development, testing, troubleshooting and debugging of software applications Interfacing with clients for gathering
business needs, conducting system analysis and finalizing technical / functional specifications, low level & high level
design documents, use cases, design documents and build scripts; Undertaking analysis of functional, business &
technical impacts on channels due to upcoming changes Defining technical architecture considering real time constraints,
functional requirement & non-functional requirements and subsequently realizing it into software; ensuring reliability &
quality of software Conducting reviews of codes and test cases; analysing change requests and enhancements; providing
post-implementation, application maintenance and enhancement support to the client with regard to software application
Performing data analysis of daily reports and pattern development to meet & exceed clients' requirements Managing
timelines and resources (internal and external) within the software development lifecycle; ensuring technical integrity of
project deliverables
Providing support for resolving production support problems; suggesting alternative approaches to resolve problems

Education

UG: **B.Tech/B.E. (Computers)** from **Sikkim Manipal Institute of Technology, Gangtok** in **2018**

IT Skills

Skill Name	Version	Last Used	Experience
Web, Desktop			
IDE - Eclipse, PyCharm			
Platforms: Windows, Linux			
Tomcat			
CI/CD: Jenkins			
Junit, TestNG, Selenium, Postman			
Java, Python, HTML, CSS			
Spring Boot, Swagger			
Spring
