Work Experience

⦿ **Fidelity Investments** as Web Developer
Jun 2016 to Till Date

Project Name: Thrive   Sep 2020 - Till Date

Description:
Thrive is a platform where users can post various projects with skill requirements, number of hours, title and description of the project. Other users can apply for the project that they can all see in the home component, filter it with select dropdowns and refine the search. Similarly, owners of the project have editing and deleting capabilities. Home page dashboard also showcases participants with highest points to lowest. Filter by status of project like completed projects, current projects and all projects are also available.

Roles & Responsibilities:

*   Developed Bootstrap responsive web application pages using Angular components, directives, modules, services and DI for front end UI, consuming the Restful web service API and SCSS.
*   Coded in Angular Components based framework to build scalable Web application for the internal use of the organization.
*   Hands on Experience on Angular 2 technology for one complete project in rebasing the UI of the application using the techniques in Angular 2.
*   Extensively use Observables (subscription/un-subscription, success and error) while making async communication.
*   Wrote http services using Angular services design pattern to keep everything in one place.
*   Architected the application using Lazy modules for performance.
*   Used Typescript for strong typed codebase.
*   Implemented Graceful Error Handling in the client-side

* Used JSON for data exchange between client and server.
* Made use of directives like *ngIf to load only essential view from performance perspective.
* Used only necessary HTML markup and SCSS styles to for better performance.
* Used ng build --prod to generate final build for production.
* Participated in Sprint planning meetings and daily standup meetings.
* Participated in Retrospective meetings for future release improvements.
* Used JIRA to keep track of bugs to reduce downtime, increase productivity, and Communication.

◉ **Sigma Infosolutions** as Front End Developer
Jun 2013 to Jun 2016

Role & Responsibilities:

* Implement responsive design using Twitter Bootstrap and customized bootstrap styles as per brand styles and developed a responsive application for all platforms like Desktop, Mobile, and Tablet.
* Maintained Cross-Browser compatibility & implement the responsive design using Twitter Bootstrap, custom media queries, jQuery etc.
* Use Firebug, Firebug Lite, Chrome and IE Developer Toolbar, for Debugging and Browser compatibility.
* Worked closely with other senior developers, product managers, system architects, and the QA team to deliver optimal designs and software to meet and exceed expectations.
* Developed many Themes and Templates for Magento, Drupal, WordPress and C# software applications (i.e., mobile and desktop).
* Participated in Scrum meetings and Sprint Planning meetings.
* Participated in backlog Grooming sessions organized by product owner.
* Mentoring new joiners on product and tools.
