Domains worked in: Ultimatix Frame-Works(TUF), Aarogyasri Health Care(AHC), Pradhan Mantri Jan Arogya Yojana or National Health Protection Scheme(PMJAY).

Work Experience

Tata Consultancy Services Ltd. as Application Developer
Jan 2017 to Till Date

Project Experience : Ultimatix-Frameworks, Ultimatix-Widgets
Project Description Ultimatix-Frameworks:
Ultimatix Frameworks provides frameworks to the Tata Group projects in order to accomplish their requirement and functionalities of their respective Application with updated new features which will reduce the complexity of the Application. The frameworks are provided to the Application teams in the form of jars, which will be placed in the Centralized repository of Tcs(Nexus) with the various updated versions according to the need of the Client. Which will be used by the Application Teams. The deployment will take place through Jenkins.
Ultimatix-Widgets:
Ultimatix widgets provides the user friendly bot which uses Artificial Intelligence to resolve the queries of the user in the TCS Internal Portal specific to the applications. For this the respective teams should have to integrate with the Widgets. The aim of the application is to integrate all the applications which are present in the portal to integrate with widgets. And to create a report on regular basis on the statistics of the Widgets in different Applications.
Responsibilities:
Worked as Application Developer in one of the TCS product -"Ultimatix Frameworks", which supplies frameworks to the TATA-Group.

Integrating Widgets with Tata group applications in the portal and testing it in various environments like UAT,SIT, PRE-PROD and PROD.
Assignment of Work and mentoring the team and ensuring Quality, on time and defect free delivery.
Interfaced with cross-functional team of business analysts, developers and technical support professionals to determine comprehensive list of requirement specifications for application.
Helped in signing the customers by delivering features requested by potential customers in very less span.
Developing Screens using Angular, Bootstrap and Spring Framework.
Server Maintenance using TGIM portal and code deployment using Jenkins.
Writing SQL queries to fetch data from the servers in developing business logic.
Doing tasks in our test environment servers by running some Linux commands.
