Work Experience

Cognizant Technologies Solutions as Associate - IT
Jan 2015 to Till Date

Project #1 (Current) : Kanter Media

Project Description:
Kantar - Editorial

* Kantar Media is one of the global leaders in media intelligence, providing
clients with the data they need to make informed decisions on all aspects
of media measurement, monitoring and selection. * The Editorial Application takes the data in the form of articles, reviews
those articles, provides summary and prepare them for distribution in a pack.

Roles and Responsibilities:
* Involved in requirement gathering for product enhancements, design and Application development.
* Hands-on experience on tools: VSTS, SQL Server 2014, MS Visual Studio 2017, Kibana, MS Office (Word,Excel)
* Identified problems, fixed issues, evaluated new options of similar technology and formulated proactive solutions.

* Coordination with the business team in onsite for requirement clarifications & suggestions.
* Perform peer to peer Code review and delivered quality code.
* Deployment of code in IIS for UAT and Production servers.
Project #2 (Current) : Maritz INC

Project Description:

Maritz is a sales and marketing services company that designs and operates employee recognition and reward programs, sales channel incentive programs, and customer loyalty programs. Maritz has many sub projects and we work for a number of applications.

It starts with collection of customer information from clients in the form of flat files and the information is loaded to internal system. Then the cleaning rules are applied identifying eligible customers to take the survey and returns to the surveys will be loaded into internal system which will later be validated for the business purpose and its growth.
This program involves contacting customers shortly after a sales or service event occurs. The feedback or questionnaire results are feed to system for various reports.

Role and Responsibilities:

*   Worked on various automations and enhancements by writing SQL stored procedures and debugging SSIS package.
*   Preparing knowledge repository documents
*   Working on SQL and SSIS
*   Working on FileZilla tool for file transfers
Project 3. Robotic Process Automation
Customer Name: UBS
Tools & Technologies: Automation Anywhere 10.2

Description
This project is based on wealth Management of various divisions of finance. In this project we will get number of accounts which we need to work on. We need to extract loan no. From excel & search in Web Application & download invoices (PDF) from there. Then we need to match invoice economics before submitting for claim. Project is categorized into few modules, where different tasks are performed using macros.

*   Gathering detailed requirements from Client for business requirements
*   Designing prototypes based on business rules
*   Implementing VB scripts for invoking outlook objects and excel operations
*   Implementing business rules using automation anywhere components
*   Coding various modules using various AA components like object cloning, PDF operations
*   Excel operations, Decision rules, Loops, Variable operations OCR components...etc.
*   Implementing effective exception handling to avoid abnormal termination of execution.
*   Interacting with client to understand the business on daily basis.
*   Involving end to end unit testing.
*   Preparing feasible study documents based on requirement.
*   Implementation of generic component using meta bots
*   Effectively used workflow designer
Project 5: Data Breach.
Role: .NET Developer
Team Size: 4
Technical environment: ASP .NET, C#, ADO.NET, SQL Server.
Project Description:
Data Breach is all about moving columns/tables that are identified as Secure PII data to a Secure SQL database. New Secure SQL DB will be accessed only through Corporate App Secure/ Corporate Batch Secure servers. Applications will be changed to access the data in the new secure locations.
