Communicate across team for smooth business operation.
Cobol Code review of team members and peers.

Quaterly Audit delivery and Delivery progress sharing with Sr. Mgr
Environment   Technology: COBOL,DB2, JCL, VSAM

Tech Mahindra Ltd as Associate Tech Specialist
Jul 2007 to Sep 2015

Project Name   Automated Supply Chain(ASC), Supply Chain Maintenance.
Company Name   Tech Mahindra
Client Name   British Telecom
Period   Dec 2011 - Sep 2015(3 years 9 months)
Project Description   ASC(Automated Supply Chain) is a mainframe based application for Inventory order handling and stock maintenance for BT. It tracks wholesale orders for BT(British Telecom) and reconcile the stock, order stock from vendor, generate invoice/receipt, send order shipment response, reconcile stock level across inventories.
For the maintenance of inventory, new supplier introduction into process, new product launch - the ASC modules need upgrading and maintenance and new modules are built to cater new functionality delivered.
The ASC maintains records for Sales order/Purchase order raised, material request for stock transfer across inventories.
Requirement Analysis and prepare design for enhancements.
Leading team of 3 to develop several modules.
Developing COBOL, DB2 modules(Batch and online).
Maintenance of Batch codes. Provide fix for incident ticket raised.
Communicate across team for smooth business operation.
Code review of team members and peers.
Technology: COBOL,DB2, JCL, CICS, CA-7
Project Name   UKB Migrations.
Company Name   Tech Mahindra
Client Name   British Telecom
Period   April 2011 to Nov 2011 (7months)
Project Description   BT wants to have all the consumer and business telecom customers billed on one strategic platform - Geneva. However, the customer was being billed on legacy platform of Mainframe. As part of migrations, the legacy data needs to be moved on to Strategic environment. As part of this migration, field mapping and data mapping needs to be done for shifting the platform. Also data feeds needs to be extracted from mainframe environment to strategic environment.
New VB Macros has to be written so that CICS transaction could be executed through the macros for data extraction and data cleanse.
My Role   Understand the data migration work along with find out how to automate CICS transaction by VB macros.
Developing VB macros with CICS.
Define the process for VB Macro execution for smooth operation of business processes.
Manage delivery of all codes within a team of 6 members.
VB Macro Code review of peers.
Use VB macros for data cleanse before migration.
Environment   Technology: VB Macro integration with mainframe CICS.
Project Name   CSS Billing (Customer Service Systems)
Company Name   Tech Mahindra
Client Name   British Telecom
Period   Oct 2007 to March 2011 (3yrs 5 months)
Project Description   CSS(Customer Service System) Billing is BT's legacy platform for billing of PSTN customers. It is a mainframe based application which handles billing, discounting, accounting functionality. There are mainframe batch codes and online codes which govern all financial transaction from rating, charging, billing and discounting.
The codes need enhancement with change in customer requirement and updates because of change in marketing strategies.
My Role   Developing batch codes (COBOL with IDMS),JCL.
Define the scheduling of batch codes on CA7 schedular for smooth operation of business processes.
Maintenance of Batch codes. Provide fix for incident ticket raised.
Manage delivery of all codes within a team of 6 members.
Code review of peers.
Environment   Technology: COBOL, CICS, IDMS, VSAM ,JCL,
