Work Experience

Velocity Software Solutions Pvt. Ltd. as Software Developer -PHP
Feb 2018 to Till Date

PROJECTS UNDERTAKEN

Project 1
Project Title   : UKSoccershop
Project Duration   : More than 2 years from May 2018
CMS/Framework   : Zencart, CakePHP (Stock Management System)
Technologies Used   : PHP, HTML, JavaScript, AJAX, XML, jQuery, JSON
Database   : MySQL (PhpMyAdmin and Adminer)
Team Size   : Assistant team lead and Developer

Details: - It's a football merchandise website in UK. You can reach the website here - https://www.uksoccershop.com/.

Responsibilities:-
To add new features or update the existing modules in Stock Management system like mailing system and scanning system which are responsible for packing orders in the warehouse and booking shipment with different postal services. To book shipments we have used API integration method for each postal service.
Third party integrations using their REST and SOAP API.
To update the site with new features that can boost up the sales and keep looking for ways to pave my client's website ahead of its competitors.
Proper testing of the developed code at various stages to detect bugs.
To help out the junior developers of the team and to review their work before sending it on production.
To train new developers with the functioning of the website and ease their way into the team.

Implemented the order integration of different multisite like soccerclasico.com (Based on Shopify), Teamzo, etc.
Set CRONs to schedule any job.
Project 2
Project Title　　　　: Geek Gearbox
Project Duration　　　: 1 year from August-2019
CMS/Framework　　: Word press, Woo Commerce and CakePHP
Technologies Used　　: PHP, HTML, CSS, JavaScript, AJAX, XML, JQuery, JSON.
Database　　　　: MySQL (PhpMyAdmin and Adminer)
Team Size　　　　: 3
Role (in project)　　　: Team Lead and Developer

Details:- e-Commerce website that contains Subscription boxes as well. Uses third party platform "Cratejoy" to maintain subscriptions. Created a system in CakePHP to process orders. Used Woo Commerce APIs to interact with Woo commerce in CakePHP system. You can visit the website here - https://www.geekgearbox.com/

Responsibilities:-
Created the complete Stock Management System that includes Order Processing and Mailing system.
Integrated Woo Commerce and Cratejoy through their APIs to fetch their orders and process them accordingly.
To make custom changes in the inbuilt plugins of word press or woo commerce as required by the client. Also used to find the combination of the plugins suitable for the Client's requirements. For example, the client want to move from Cratejoy to Woo Commerce Subscriptions so we have to add many custom changes in that plugin and have to use one additional plugin - "Custom Delivery" to meet his requirements.
Task Management and Client Interaction for all the queries regarding any task are done by me.
We also have done theme customization as per the client's requirements.
Migrated from HTTP to HTTPS and setup SSL.
Setup and Hosted the site on Amazon AWS and setup RDS for database.

Project 3
Project Title　　　　: Krystellie Fashion
Project Duration　　　: 6 months
